Limited Warranty:

Used with normal care, this EdgeCraft product is guaranteed against defective material and workmanship for a period of one (1) year from the date of original purchase ("Warranty Period"). We will repair or replace, at our option, any product or part that is defective in material or workmanship without charge if the product is returned to us postage prepaid with dated proof of purchase within the Warranty Period. This warranty does not apply to commercial use or any product abuse. ALL IMPLIED WARRANTIES, INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO THE WARRANTY PERIOD. EDGECRAFT CORPORATION SHALL NOT BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES. Some states do not allow limitations on how long an implied warranty lasts and some states do not allow exclusions or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you. This Limited Warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

This product may be covered by one or more EdgeCraft patents and/or patents pending as marked on the product.

Conforms to: UL 1082   Certified to CAN/CSA: C22.2 No.64 120 volts/60Hertz, 1500 watts

© EdgeCraft Corporation 2014 C14  T675601

CAUTION:
The Hot Pot always gets hot during operation. DO NOT touch the metal body or lid; lift the Hot Pot only by the handle and lift the lid only by using the lid lever. Exercise care when opening the lid while the Hot Pot is still hot or contains hot water.

Care and Maintenance of Your Chef'sChoice Hot Pot

• The Chef'sChoice Hot Pot is designed specifically for heating food. Do not attempt to heat anything other than water in the Hot Pot. (With liquids and mixtures of low water content, the automatic shut-off switch may not function properly and the Hot Pot may be damaged.)
• Before cleaning make sure power switch is turned off, then remove Hot Pot from base unit. Unplug the base unit.
• Always wait until the Hot Pot has fully cooled to room temperature before cleaning.
• To avoid scratching, only clean the outside of the Hot Pot with a soft cloth. Never use abrasive cleanser.
• The interior of the Hot Pot can be cleaned by decalcification at regular intervals (see below).
• Rinse out the Hot Pot at regular intervals and after extended non-use. Do not immerse.
• Do not attempt to clean any part of the Hot Pot or base in the dishwasher.

Decalcification

In areas with a high lime content in the water supply, the Hot Pot should be decalcified at regular intervals.
• Fill the Hot Pot with a solution of 16 oz. water, add 6 tablespoons of vinegar, and bring to a boil.
• When process is complete, rinse the Hot Pot twice with clean water.
• Commercially available liquid decalcifiers may also be used. Follow the instructions provided with decalcifier by its manufacturer.
• Regular decalcification will keep the Hot Pot operating at peak performance and electrical efficiency. It will also extend the life of the Hot Pot.

Bowl-dry Protection

This Hot Pot is equipped with a self-resetting "bowl-dry" switch which protects the appliance in the event of improper use. If heating is accidentally started without water or if the water evaporates completely, the appliance is automatically switched off by a "bowl-dry" protection. Try to avoid allowing the Hot Pot to "bowl-dry". If the "bowl-dry" protection is actuated, disconnect the power cord and allow the Hot Pot to cool down for a few minutes (CAUTION: Small amounts of hot water remaining in the Hot Pot can cause scaling injuries) and then refill with cold water. The Hot Pot will now operate normally.

Limited Warranty: With retail sales only, this EdgeCraft product is guaranteed against defective material and workmanship for a period of one (1) year from the date of original purchase ("Warranty Period"). If the product is returned to us, at our discretion, any product or part that is defective in material or workmanship will be repaired or replaced without charge if the products returned to us, postage prepaid with dated proof of purchase within the Warranty Period. This warranty does not apply to commercial use or any product abuse. ALL IMPLIED WARRANTIES, INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO THE WARRANTY PERIOD. Edgcraft Corporation SHALL NOT BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES. Some states do not allow limitations on how long an implied warranty lasts and some states do not allow exclusions or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you. This Limited Warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

Model 675
When using electrical appliances, basic safety precautions should always be followed, including the following:

1. Read all instructions carefully.

2. Do not touch hot surfaces. Always use safe handling procedures.

3. To protect against fire, electric shock and injury to persons, do not immerse cord, plug, Hot Pot® or water base in other liquid or water.

4. Close adult supervision is necessary when any appliance is used by or near children, handicapped persons or the infirm.

5. Always unplug power base when not in use or in order to avoid accidental electrical shock. Allow the Hot Pot® to cool before cleaning.

6. Do not operate with a damaged cord or plug, or after a malfunction has occurred. Cord or plug should not be repaired; return appliance to a service center for examination, repair or adjustment.

7. The use of an extension cord is not recommended by the EdgEcraft Corporation or any other manufacturer. If an extension cord is used, it should be an approved 3-wire appliance extension cord, and the electrical rating of the cord should be at least as great as the electrical rating of the Hot Pot®, and match the configuration of the plug. The longer cord should be arranged so that it will not drape over the countertop or tabletop where it can be pulled on by children or tripped over.

8. Use only Hot Pot® accessories recommended by the EdgEcraft Corporation or another manufacturer.

9. Never fill Hot Pot® above the “MAX” line shown on the water level gauge. For the same reason, extreme caution must be used when moving an appliance containing hot water or other hot liquids.

10. Please take a minute to familiarize yourself with the following instructions to maximize your enjoyment of your Hot Pot.

11. Do not use Hot Pot® for other than intended use.

12. Do not attempt to plug any device other than designated Hot Pot® or power base into Hot Pot®.

13. Do not place on or near hot gas or electric burner or in a heated oven.

14. Do not attempt to plug any device other than designated Hot Pot® or power base into Hot Pot®.

15. Never fill Hot Pot® with water to a level above the “MAX” line shown on the water level gauge. For the same reason, extreme caution must be used when moving an appliance containing hot water or other hot liquids.

16. Always pour water slowly into the Hot Pot®. Do not pour water or other liquid directly into the power base.

17. CAUTION: Unplug IMMEDIATELY if water spills up into bottom of Hot Pot®, onto power base or into water base. Immediately unplug Hot Pot® and do not use.

18. CAUTION: To avoid the risk of being scalded never fill Hot Pot® above the “MAX” line shown on the water level gauge. For the same reason, extreme caution must be used when pouring water, hot water or other hot liquids into or out of the Hot Pot®.

19. Only operate Hot Pot® on a dry, non-slip surface.

20. For household use only.

SAVE THESE INSTRUCTIONS

Made a Good Choice!

Your Chef’sChoice® Certified Hot Pot® is the best of its kind. It can efficiently boil 1.8 quarts of water in only minutes. An appliance of such quality, excellence, careful attention has been given to every detail from the sleek design to the triple-protection safety switches. No detail has been overlooked.

A convenient internal water gauge lets you know the water level even when the lid is closed. The Hot Pot’s enclosed heating elements allows for an easily cleanable, stainless steel interior and insures years of service from this elegant yet durable product. Please take a minute to familiarize yourself with the following instructions to maximize your enjoyment of your Hot Pot.

First Use of the Hot Pot

• Read all safety and operating instructions carefully before using the Hot Pot® for the first time.

• For brand new Hot Pots, do not use first filling of boiled water, discard it and rinse out the Hot Pot® with cold water, after the Hot Pot® has cooled down.

• The time required for the Hot Pot® to automatically switch off after the boiling point is reached will vary depending on the amount of water in the Hot Pot®, it will switch off faster if filled to its “Maximum” level than if filled to only a minimum level.

• A short power supply cord is provided with this appliance to reduce the risk resulting from its becoming entangled in or tripping over a longer cord and causing the Hot Pot® to overturn, discharging its hot contents. While EdgEcraft does not recommend it, extension cords are available and may be used if care is exercised in their use. If an extension cord is used the marked electrical rating of the extension cord should be at least as great as the electrical rating of the Hot Pot®, and match the configuration of the plug. The longer cord should be arranged so that it will not drape over the countertop or tabletop where it can be pulled on by children or tripped over.

• Plug base unit into a 110-120 VAC outlet.

• Push down the Hot Pot® switch (see photo) to the on position. The switch will illuminate to indicate the power on.

• The Hot Pot® switches off automatically a few seconds after the boiling point is reached.

• The Hot Pot® is not designed for professional use. If the appliance is used to prepare foods for professional use, it is the responsibility of the user to ensure that the appliance is properly used. Replacing the Hot Pot® on the base unit when finished pouring. The power switch must be pushed down to the off position if you wish to reset the Hot Pot® to the safe condition before use.

• The automatic shut-off switch is located at the base of the Hot Pot®. Upon automatic shut-off you may see a few drops of water on the base unit. This condensate will not impair the operation of the Hot Pot®, nor its safety.

• Unwind the power cord to the desired length before plugging the cord into a powered outlet (see instructions for short cord application).

• When this appliance has a polarized plug (one blade is wider than the other), as a safety feature, this plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse it. If it still does not fit, contact a qualified electrician. Do not attempt to defeat this safety feature.

• A short power supply cord is provided with this appliance to reduce the risk resulting from its becoming entangled in or tripping over a longer cord and causing the Hot Pot® to overturn, discharging its hot contents. While EdgEcraft does not recommend it, extension cords are available and may be used if care is exercised in their use. If an extension cord is used the marked electrical rating of the extension cord should be at least as great as the electrical rating of the Hot Pot®, and match the configuration of the plug. The longer cord should be arranged so that it will not drape over the countertop or tabletop where it can be pulled on by children or tripped over.

• Avoid spilling water on the base unit.

• Disconnect the power cord from the power outlet.

• Use only Hot Pot® accessories recommended by the EdgEcraft Corporation or another manufacturer.

• Remove Hot Pot® from the base and re-insert the electrical connector and power cord into the power outlet.

• Allow the Hot Pot® to cool before cleaning.

• The Hot Pot® has an automatic switch-off device which deactivates the appliance shortly after the boiling point is reached. For the proper functioning of the automatic switch-off, it is necessary that the lid be completely closed. The automatic switch-off is located at the base of the Hot Pot®. Upon automatic switch-off you may see a few drops of water on the base unit. This condensate will not impair the operation of the Hot Pot®, nor its safety.

• The Hot Pot® is equipped with a convenient automatic switch-off device which deactivates the appliance shortly after the boiling point is reached. For the proper functioning of the automatic switch-off, it is necessary that the lid be completely closed. The automatic switch-off is located at the base of the Hot Pot®. Upon automatic switch-off you may see a few drops of water on the base unit. This condensate will not impair the operation of the Hot Pot®, nor its safety.
