

HOW TO CHOOSE THE PROPER LEG EXTENSION FOR YOUR EZEE™ CO-SLEEPER® BASSINET

The **Ezee™** leg extensions are designed for the **Ezee™** Co-Sleeper® models only. Please check your Co-Sleeper® bassinet and make sure it is an **Ezee™** model manufactured on or after 3/2016 (find this information on the MFG sticker located on the product leg) before ordering.

Leg extensions must only be used when attached to the adult bed. **DO NOT** use them when the Co-Sleeper® is in the bassinet or play yard mode.

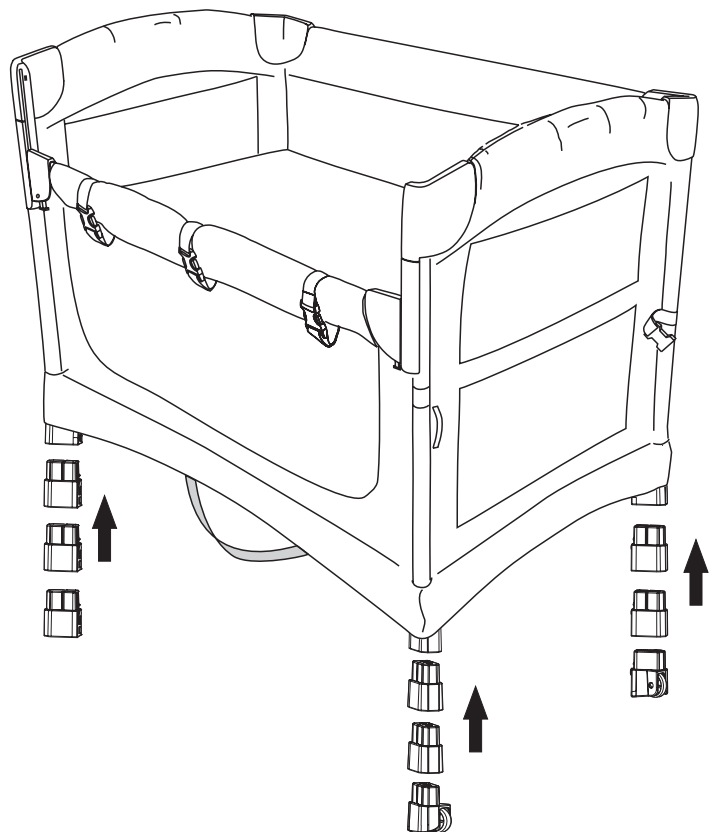

PROPER USE OF THE LEG EXTENSION KIT :

Remove the two wheels from your bassinet. Insert the leg extension to bassinet legs to reach the desired height. Reattach the two wheels.

The leg extensions raise the Co-Sleeper® bassinet in 2" increments from 24" to 30" (measured from the floor to the top of the adult bed). It is **NOT** recommended to raise the Co-Sleeper® more than 30", as the bassinet could become unstable. The lowered rail in the co-sleeping mode should be flush or lower than the top of the adult mattress.

Ezee™ leg extensions are made specifically to fit the below Co-Sleeper® bassinets models. If your Co-Sleeper® bassinet model number is not listed below, you will need the regular Co-Sleeper® leg extension.
