How to set up the Arm's Reach® Co-Sleeper® bedside bassinet

⚠️ WARNING: Failure to follow these warnings and instructions could result in serious injury or death.

Step 1
Undo the Velcro® straps of the mattress (B) and set the mattress to the side.

Step 2
I. Stand bassinet in upward position (make sure bassinet is completely closed (e.g. box-ready position).
II. Grab both top SHORT bars from anywhere except the CENTER of the bars, then simultaneously and forcefully pull both bars upward in one quick action with both hands. Check that both short bars are locked.

Step 3
While keeping the bottom half of the bassinet NON-expanded, repeat the same process on the two top LONG bars from anywhere except the CENTER of the bars.

Step 4
I. After locking all four top bars, locate the access hole on the fabric support for the mattress.
II. Reach through the access hole and push downward on the bottom base to expand the bottom half of the bassinet. You will hear and/or feel a click when the bottom base has locked into place. Enclose the red release strap with the flap cover.

Note: Always keep the release strap under cover. Secure Velcro® on all sides to avoid unintended collapsing of the product.

Step 5
Install the wheels and leg increments as figure shown.

Note: Be sure to install the white leg increment in the middle leg slot.

Step 6
Install Mattress Support Bars(C) into fabric tunnels on nest bottom. Place sheet (A) on mattress (B) and lay mattress on sleeping nest. If a gap is visible on either side of the mattress after installing, reposition the mattress then stretch the mattress and sheet on both ends to cover the gaps. The sheet (A) and sleeping nest bottom have Velcro® tabs that align for added security.

The co-sleeping mode is set up now. Go to page 8 to attach the Co-sleeper® bassinet to adult bed.

⚠️ WARNING: SUFOCATION HAZARD - To help prevent suffocation and entrapment, use ONLY the mattress pad provided by Arm's Reach Concepts, Inc. NEVER use additional padding or mattress. DO NOT use shipping or other bags as mattress covers since they can cause suffocation.
