

Certificate of Analysis

April 16, 2019

Product: Better Serum (125 to 250 mg)
Lot #: SMCBDO-03
Best Before: April 2021
Manufacturing Month: April 2019
Storage Conditions: Store in a cool dry area; away from direct sunlight.

Table with 3 columns: Properties, Specifications, Results. Rows include Appearance, Odor, pH, Flash Point, Solubility, Total Bacteria Count, and Total Yeast & Fungal Count.

This product lot number is certified as described above. The data were obtained using the test indicated and is subject to deviation in the test method. Results may vary under other test methods or conditions.

Better Serum (125 to 250 mg) Date of Test/Release April 16, 2019 This report is not to be signed.

Cannabinoid Profile & Potency [WI-10-17 & WI-10-17-01]

This sample was analyzed for plant-based cannabinoids. The collected data was compared to data collected for certified reference standards at known concentrations.

Table with 3 columns: ID, Weight %, Concentration. Lists various cannabinoids like D9-THC, THCV, CBD, CDBV, CBG, CBC, CBN, THCA, CBDA, CBGA, D8-THC, and exo-THC, along with Total, Max THC, and Max CBD.

Ratio of Total CBD to THC 19.5:1

Max THC (and Max CBD) are calculated values for total cannabinoids after heating, assuming complete decarboxylation of the acid to the neutral form. It is calculated based on the weight loss of the acid group during decarboxylation: Max THC = (0.877 x THCA) + THC. This calculation does not include other cannabinoid isomers (i.e. D8-THC and exo-THC). ND = None detected above the limits of detection (LLD)
