# Thank You!

We dreamed of creating a clear ice maker that made stunning ice at home – *easily*. Your support for the development and manufacture of the new ice-making technology in I.M.C.™ made it happen, and now you have one of the first sets – to enjoy and impress your friends with!

*Please read the brief “How to Use,” and “Tips & Tricks” pages before you dive in!*

Enjoy the recipes and storage bag with our compliments.

# HOW TO USE **ICE.MADE.CLEAR.**™

## 1. FILL

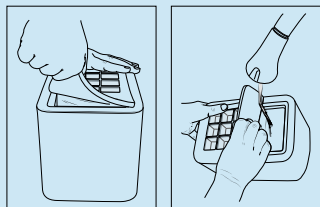

*\* Wash base and trays with mild soap before using. Do not use a dishwasher.*

- Fill the base with regular tap water 2/3rds of the way up.
- Place a tray in the base and fill to the top edge with tap water.

## 2. FREEZE

Place I.M.C.™ in your freezer. Let cubes freeze. 1.25" cubes will require 6-10 hours to freeze. 2" cubes will need 12-24 hours.

## 3. REMOVE

- Place I.M.C.™ on counter. Hold handle and pull slowly but firmly upward, peeling the silicone tray up and out of the base.
- If the tray is too difficult to remove, run a bit of hot tap water down the back of the handle, then try removing the tray.

## USE AGAIN

Remove any water or ice from the base before using again. Run hot tap water into the base until ice is loose. *Note: ice may be sharp.*

## ICE.MADE.CLEAR.™ TIPS & TRICKS

- ❖ Place I.M.C. in the freezer where there are no vents blowing air directly over it.
- ❖ For the most perfect ice, use very hot tap water (this may slow freezing). *Never use boiling water.*
- ❖ Distilled / Purified tap or bottled water is not recommended. Spring water is ok.
- ❖ I.M.C. is denser than traditional ice. let the cubes sit for a few minutes before using so they do not crack.
- ❖ From time to time, 1-2 cubes may have a small amount of cloudy water on top after freezing. This is a surface artifact only, and can be rinsed off or dissolved quickly in a drink.
- ❖ Rarely, one or two of the cubes might extrude upward when freezing. Simply discard these cubes if you wish.
- ❖ *Caution: Leftover ice in the base after freezing can be sharp.*
- ❖ Enjoy!
