

SIDETRAK SCREEN PROTECTOR

START GUIDE

Congratulations on your purchase! We are confident that you will love your new SideTrak screen protector. Our mission is to bring joy to people at work by offering products that make working remote or on-the-go easier and more comfortable.

LOVE YOUR WORK, WHEREVER YOU WORK!

SideTrak screen protector is made out of tempered glass to offer more protection, be smoother on your fingers, and won't scratch easily!

Here's your step-by-step guide on how to install your new tempered glass screen protector:

STEP 1: CLEAN YOUR SCREEN

Make sure your SideTrak is turned off and extend the SideTrak all the way out. Use the alcohol wipe to thoroughly clean your screen, use the blue film to remove any remaining particles, and then use the microfiber cloth to give it one last polish for good measure. Ensuring that the screen is clean from all dust will help the screen adhere better and will prevent any bubbles from forming.

STEP 2: PEEL PLASTIC FILM

There's a protective plastic film on one side of the protective glass. Start by removing only about an inch of the film, but be sure to hold it by the edges so that you don't leave fingerprints on the surface. This side will be going face down on the SideTrak.

STEP 3: ALIGN AND PLACE

Align the exposed part of the screen protector evenly with the edges of the SideTrak screen. Once the screen protector has been properly aligned, carefully lay it down. If you make a mistake and the glass looks off-kilter, you can gently lift it up and realign it.

Once the protector is on the screen, keep it at a low angle and slowly peel off the rest of the plastic film, use a tool like a credit card to help you lightly press the screen protector onto your SideTrak and to wipe the bubbles out.

STEP 4: REMOVE AIR BUBBLES

Work your way from one side of the screen to the other, wiping the air bubbles towards the edges. If you get a lot of bubbles you can gently lift the screen protector to remove the air bubbles.

STEP 5: ENJOY

You are all done! Now you have a well protected SideTrak screen!

If you have any questions, we are here to help!
