DOCK LINES

Product	Size	Spool	Approx B/Load (kg)	Weight /100mts (kg)
PS16	16mm	100mtr	4234	11.82
PS24	24mm	85mtr	5630	17.95
PS28	28mm	100mtr	7345	28.84
PS32	32mm	100mtr	10549	30.53

* Break loads shown, spliced at both ends.

POLYESTER 16-32MM

Constructed from highly twisted polyester with no core, Pro splice has high elongation and flexibility with the unique ability to take out the splice and re-readjust.

Features and benefits over other dock lines.

- * Far lighter than similar-sized lines, due to the unique hollow core construction.
- * Easy to splice, with the ability to readjust the splice after the lines have bedded in.
- * Very smooth weave means less friction and abrasion over surfaces than 3 strand nylon.
- * Less noise at rest over 3 strand nylon dock lines.
- * Better looking with UV stabilized polyester.
- * Unlike three-strand nylon, polyester does not swell.
