## CELL MINS

***Nourish your function, appetite and repair. Feed your cells.***

**Cell Mins** is a blend of minerals that are needed by every fiber and process of the body. They work like a magnet to help attract more minerals from food, with their low dose, high absorptive profile. Amazingly they help to balance both deficiencies and excesses. I've seen incredible results in babies, toddlers, and children, especially in normalizing appetite. The most commonly noticed benefit is an increase in appetite especially in the case of picky, selective or resistant eaters. In the 20 years that I've been a nutritionist, every child that I've ever tested has needed **Cell Mins**.

Cell minerals are well known to increase the constitutional health of a person over an extended period of time as they help to rebuild from a cellular level to the organs and tissues.

**Cell Mins** suitable for every member of the family.

## DOSAGE

**Dosage for adults (12+):** 30 drops twice a day, into the mouth or in a small amount of water.

**Children age 3-12:** 3 drops for each year of age, twice a day. Drop right into the mouth or a small amount of water and give by syringe or drink from a cup.

**Children under 3:** 2 drops for each year of age, twice a day. Drop right into the mouth or a small amount of water and give by syringe or drink from a cup.

**Cell Mins** is free of wheat, yeast, corn, soy, gluten, eggs, dairy, artificial colours, flavours, sugar and toxic preservatives.
