

TUBELESS TIRE SETUP

TECH TUTORIAL: UNBOXING AND SETUP

REVISION 9/17/2020

1) Eminent bikes no longer come with tubes. Your bike is set up with tubeless valves, tape, and seated tire beads. **NO SEALANT IS INSTALLED** to avoid potential sealant leak during transportation. Sealant must be installed prior to any riding. You will find sealant in the tools box. Please go to www.youtube.com/c/eminencycles and follow the tubeless setup video. **DO NOT RIDE UNTIL YOU HAVE COMPLETED THIS STEP.**

2) In addition to the tubeless setup you will find complete unboxing video to aid in your set up on the Eminent Youtube channel. We recommend reviewing it as you build your bike and referring to this manual as needed.

3) If you have any questions on set up we are here to help. Drop us an email at info@eminencycles.com or call (858) 704-2456 during normal business hours.

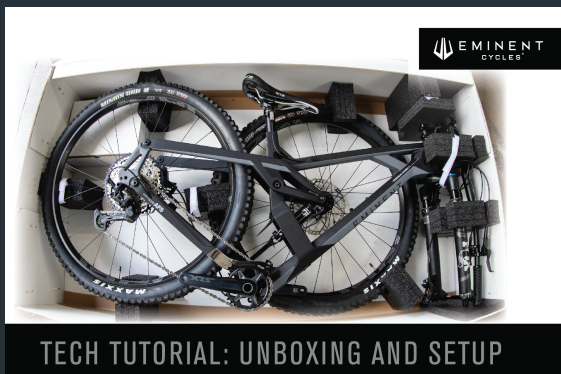

Happy New Bike Day,

EMINENT
