

## Indoor Ultrasonic Rodent Repeller with Advanced Sound Sweep Technology

### Getting Started

#### Key Features:

- Easy installation - Just Plug It In
- Eco Friendly - No Toxic Chemicals, Poisons or Traps
- Advanced Sound Sweep Technology
- Portable, Lightweight and Discreet
- Inaudible to Humans
- Low Energy Consumption
- Night Light Option

#### Inside The Box

- UltraSweep Mini
- This Manual

#### Installation

- Plug the unit into a standard wall outlet. The light on the front of the unit will activate, letting you know that your UltraSweep Mini is now powered on.
- Make sure that there are no obstructions directly in front of the unit such as furniture or appliances. This will allow the sound to travel throughout the room for maximum coverage.
- Use at least one unit for each room in which you're having a pest problem.
- Be sure to keep rodent pets such as hamsters and gerbils away from any rooms in which you're using the UltraSweep Mini. Dogs and cats may need time to adjust to the sound.
- Press the illuminated button on the front of the unit to activate the optional Night Light.
- With continuous use, a significant decrease in rodent activity should be seen within 2-3 weeks. You may see an increase for a short time while the unit drives rodents out of their hiding places. This is to be expected but will quickly subside.

#### Specifications

- |                      |                                     |
