

MARINE GRADE CABLE RATCHET WINCH HOISTS

Lug-All® Come Along Ratchet Winch Hoists are heavy-duty, compact tools that go more places and tackle more jobs than any other hoist design on the market. They are ideal for hundreds of precision tasks: lifting, lowering, pulling, tensioning, stretching, bending, and more.

Lug-All Marine Grade Winch Hoists are made with an anodized aluminum alloy frame. These frames resist rust and corrosion caused by exposure to saltwater and chemicals, making them perfect for many marine and boating related tasks taking place within five miles of a large body of saltwater.

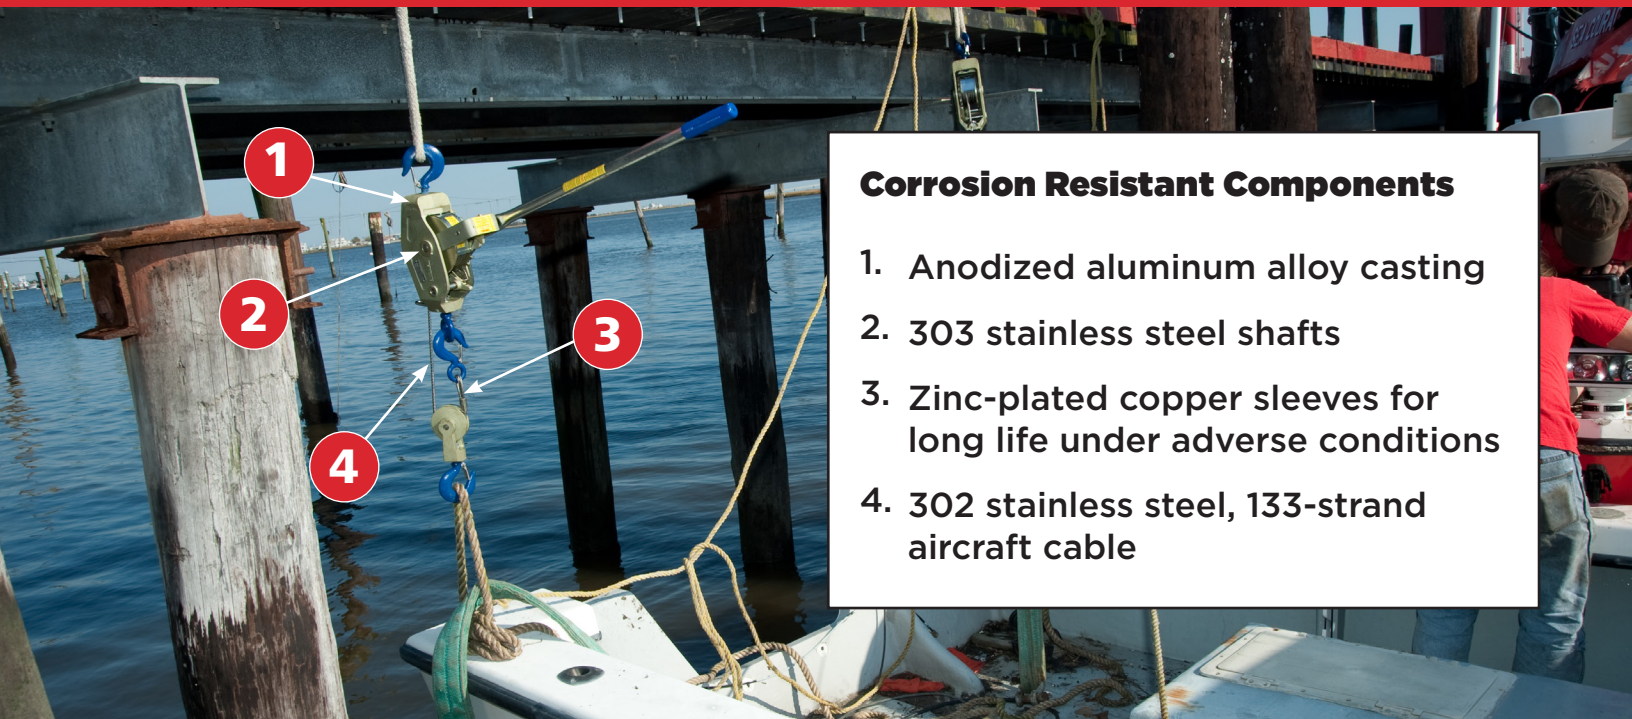

Lug-All Marine Grade Hoist Uses

- Dock Construction
- Towing
- Marine salvage and recovery
- Securing floating structures and equipment
- Raising and lowering boats and equipment
- Maintenance and repair

Lug-All Marine Grade Hoist Benefits

- Protection from sea water and chemicals means longer usability
- Stainless steel cables for strength
- Rust resistant frame and cables
- Easily accessible parts for cleaning
- Safety from accidents caused by corrosion

The quality and reliability you need for any job on or near the water.

Corrosion Resistant Components

1. Anodized aluminum alloy casting
2. 303 stainless steel shafts
3. Zinc-plated copper sleeves for long life under adverse conditions
4. 302 stainless steel, 133-strand aircraft cable
