MINDME WATCH X

SOS & GPS PERSONAL ALARM

About MindMe Watch X

The MindMe Watch X SOS & GPS alarm (MMWX) combines a watch, mobile phone (4G network), a GPS device, and GPRS satellite technologies to assist vulnerable individuals to seek assistance quickly in an emergency with one press of a button.

The MMWX gives wearers the confidence to remain independent and stay in control, by keeping them in touch with family and carers whether they are at home or out and about 24 hours a day, 7 days a week.

The MMWX is suitable for a wide range of wearers including the elderly, people with dementia, people with disabilities, children, lone workers & personal security.

**PEACE OF MIND
24 HOURS A DAY**

Features

ONE TOUCH SOS ALERT

The MMWX includes one (1) SOS button. When the SOS button is pressed, the MMWX will automatically initiate the 'Emergency Procedure'.

DIGITAL TOUCH SCREEN INC DATE/DAY

The standby display screen features a digital touch screen, clock face and the current day and date.

EMERGENCY CONTACT NUMBERS (3)

The MMWX is a self-monitored device allowing up to 3 contact numbers to be programmed into the watch. In an emergency these numbers are contacted via SMS (primary contact only) / mobile APP notification and voice call.

USE IN/OUT OF HOME

The MMWX works like a mobile phone, and can operate anywhere there is mobile network coverage. The MMWX uses the 4G network.

2 WAY HANDS FREE COMMUNICATION

The MMWX includes a speaker and microphone, allowing the wearer and contact to have a 2-way conversation.

FALL DETECTION

When a fall is detected the MMWX will automatically initiate the 'Emergency Procedure'.

REMOTE PROGRAMMING & MONITORING APP

The MMWX can be programmed, monitored and tracked remotely via a purpose built mobile APP.

REAL TIME LOCATOR VIA GPS/WIFI

The MMWX utilises Global Positioning System (GPS) technology to locate the MMWX. If GPS is not available, primarily indoors, then WiFi technology is used to locate the MMWX.

GEO FENCING IN/OUT ALERTS

The GEO fencing feature allows for a pre-set virtual boundary to be set around a central location. If the wearer breaches the pre-set virtual boundary by travelling out, a notification is sent to the mobile APP.

WATER RESISTANT

IP67 waterproof rating ensures that the MMWX will be protected against water splashes. Therefore, the MMWX can be worn in the shower and outside in the rain.

BLACK SILICONE STRAP

The MMWX comes with a black silicone wrist band.

MEDICATION REMINDER & ALARM CLOCK

Multiple medicine reminders / alarms can be programmed to alert the wearer it is time to take their medication.
