Oil/Water Interface Probes

Water Level/Quality

QED/Landtec

ORS 100' Oil/Water IF Probe

Pine Item #51764

DESCRIPTION:

This instrument rapidly and accurately measures depth to hydrocarbons and water in monitoring wells and tanks. It is lightweight, battery operated and exceptionally rugged. The ORS is built with a NEMA-3, weather-proof aluminum housing and chemically resistant probe and 100ft tape. Measurements of depth to fluid are accurate to within 1/100 of a foot. The probe fits into openings smaller than two inches in diameter, which makes it ideal for use in narrow-gauge monitoring wells. The system's dual-function probe uses an optical prism to distinguish air from liquid and an electrical conductivity sensor to differentiate water from hydrocarbons.

FEATURES:

- FM approved intrinsically safe.
- Measuring tape in engineering and metric units.

Product Specifications

Accuracy	Fluid depth to within 1/100' hydrocarbon layers to 1/200'
Approvals	Factory Mutual approved for Class I Division 1 Group D hazardous locations
Power	9V battery
Dimensions	US: 12 x 12 x 4 in. Metric: 305 x 305 x 102 mm

Local Delivery Pick-up

In-Stock Equipment
