Ends
Standard QF end can be changed to Raw ID (I/D), Raw OD (O/D), Hose Adapter (FX), Flat Bar Flange (FL), or 6mm turned out edge (FB).

Note:
The SBMS type energy saving damper is a manually operated blast gate or sliding damper.

Temperature Rating of Product Components		
° C	SBMS Manual Damper	Sealants
200°	Galvanised Steel	Joka Seal Metal Sealant 2315
121°		
-20°		

Compliance / Rating of Product Components		
Product	Material	Compliance / Rating
SBMS Manual Damper	Galvanised	DX51D with Z275 Coating
Joka Seal Metal Sealant 2315	Acetone blend	AAMA Specification 801.1

Additional Notes

At temperatures ranging between 200° C and 250° C, the zinc-iron alloy layers in galvanised steel will continue to provide a high level of protection from corrosion. However, there may be some peeling, changes in mechanical properties, and reduction in the corrosion protection. Recommended max. service temperature is 200° C.
