greenkiwiclean.co.nz

Tough Moss & Mould Remover is a powerful, concentrated moss & mould remover which will eliminate moss, mould, lichen & mildew from most surfaces both indoor and outdoor with ease. And the longer you keep it damp, the longer it will keep on working.

Concentrated for better value, 1 Litre of Moss & Mould makes up to 20 Litres of quality solution.

**MOSS & MOULD • MADE IN NEW ZEALAND**  
**NON FLAMMABLE • EFFECTIVE • EASY TO USE • HIGHLY CONCENTRATED**  
**AVAILABLE IN 1L, 5L, 20L OR 2L HOSE SPRAYER • READ LABEL & SDS BEFORE USE**

Tougher than most and concentrated to really work, Tough Moss & Mould Remover is a highly effective killer of any moss, mould, mildew, slime or gunge growing around your work or home – indoor or out. It contains not just one, but two types of chloride to kill mould spores dead and help prevent them reappearing. This gives you a more effective result than many other solutions which often promise plenty, but don't deliver where it counts.

The two chlorides combine with the bonding agent to ensure Tough Moss & Mould doesn't wash away easily and will continue to work for long periods if kept damp (don't apply in direct sunlight).

Concentrated for great value – 1 litre of Moss & Mould will make 20L of cost effective solution, and will go much further than some of the heavily advertised alternatives (working out to around 65c per litre for a 5L jerry can).

Apply with a spray bottle after diluting, or grab a handy hose applicator bottle to make application quick and easy – simply attach your hose and run at about half flow to quickly cover large areas of your roof, walls, paths or driveway.

Coverage depends on the surface being sprayed, but as a guide, you'll need about 500ml per square metre for a painted roof or wooden surfaces, and up to 1 litre per square metre for porous surfaces such as concrete, tiles or asphalt.

Caution – this is an active solution which you should use with care and follow PPE & safety instructions.
