

NON DG • NON HAZARDOUS • NON FLAMMABLE • SOLVENT FREE

SAFE

Bitumen REMOVER

Safe Bitumen Remover safely and effectively removes tar, bitumen and other emulsions from trucks, equipment, tools, signage & road cones. It also washes out in water, which helps meet the growing need for products to be friendly to both workers and the environment.

SAFE BITUMEN REMOVER • MADE IN NEW ZEALAND

Hydrocarbon solvents often require careful handling and pricy disposal methods. They are no longer acceptable to companies that have strong environmental policies.

New technology allows low volatility products (from alternative sustainable sources) to produce superior results, without the risk.

- Non flammable
- Plant based
- Non toxic
- Non caustic / acidic
- Hydrocarbon solvent free
- Easy to use and effective
- Safe for workers
- Use to mop up spills and clean tools, equipment and vehicles

**VOC FREE
BIODEGRADABLE**

Great for use in the laboratory or office and can be diluted at 20% for low level spills of oil or grease (a white emulsion will form).

Our Safe Bitumen Remover is applied neat, using a brush, rag, spray bottle or knapsack. Automated foaming systems can be used to clean large areas or trucks.

Leave to penetrate for several minutes before wiping or washing off the surface.

Thick coverings may require longer soak periods (up to ten minutes) or repeated applications.

Please refer to the product SDS before use and follow the application instructions.
