Safe Ice Blast Concentrated Spray is a safe-to-use spray which quickly removes winter ice build-up on your windscreen, mirrors, coolstores or other glass surfaces. Ensure that your vehicles are safe to operate and drivers have maximum visibility during the winter months.

MPI-C21 approved Safe Ice Blast Concentrated Spray will not impact on surfaces, is non-flammable and not a DG. It comes in a handy 1 litre spray bottle, as well as 5L or 20L drums.

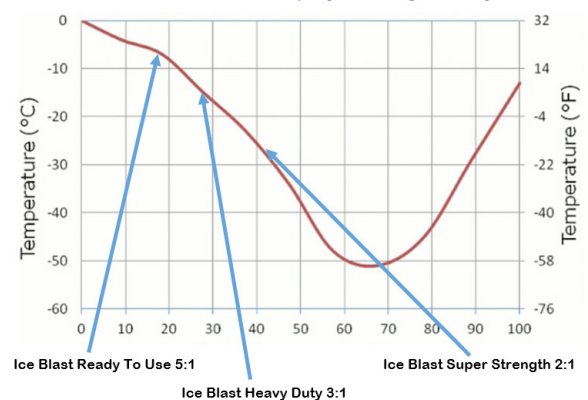

**OUR CONCENTRATED ICE REMOVAL/PREVENTION SPRAY MAKES WINTER SAFER**  
**MPI-C21 APPROVED • SAFE TO USE • NON-DG • BIODEGRADABLE • NZ MADE**

Safe Ice Blast Spray is a locally made, concentrated solution designed to prevent and remove ice build-up on all sorts of surfaces. It is ideal to use on vertical surfaces such as window glass, windscreens as well as coolstore curtains and pipes etc, where health and safety are a priority.

Ice Blast Spray contains no chloride or salt, so it's safer on metal surfaces and is an alternative to Ice Blast Granules for paths and roadways.

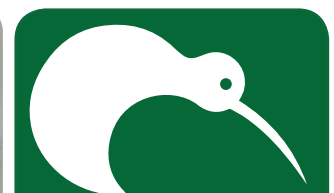

Ice Blast Concentrated Surface Spray Freezing Point By Dilution

Ice Blast Spray has MPI-C21 approval and is currently being safely used all year round in coolstore facilities. It's also well suited for the harsh NZ winter - useful around skifields and in other alpine or harsh winter environments. It comes as a concentrate as well as a ready to use spray.

Note for windows and mirrors the residue should be washed off after ice is gone, for better visibility.
