greenkiwiclean.co.nz

Weed Blast is a glyphosate-free natural herbicide with fatty acids which quickly kill the cell walls of a wide variety of weeds, and the special penetrant enhances the knock down time.

Weed Blast is most effective in the heat of the day for killing **dock, ragwort, grasses, broadleaf** & many other weeds. Some weeds may be too established, needing more than one treatment.

Weed Blast is safer on soil & plants, highly concentrated (for value) and smells pleasant. 1 litre makes up to 50L of spray!

WEED BLAST • MADE IN NEW ZEALAND

NATURAL HERBICIDE • LOW ODOUR • SAFE TO USE • HIGHLY CONCENTRATED
AVAILABLE IN 250ml, 500ml, 4L OR 20L • READ LABEL & SDS BEFORE USE

Weed Blast is a highly concentrated non-selective natural herbicide which is safe to use and contains no harmful glyphosate. Weed Blast has a natural Canola oil base with strong fatty acids which destroy the cell walls of a wide variety of weeds quickly and easily, and it includes a special penetrant to enhance and prolong the strong knock down effectiveness.

Apart from being great value for money, Weed Blast has a number of advantages over other similar solutions – a much lower application rate makes it safer on soil around desirable plants & trees, and a low odour makes it more pleasant to work with.

Weed Blast is most effective if used correctly. It works best in the heat of the day, so apply liberally to the whole plant between 10am & 3pm for fast results. Do not apply to wet foliage, or if rain is forecast. And try to avoid spraying near desirable plants and waterways. Spot spray for control of lawn weeds.

Weed Blast is effective on a broad range of weeds such as **dock, ragwort, grasses, broadleaf, clover, dandelions, creeping oxalis, hydrocotyle and old man's beard**, to name a few. It will also work to remove young gorse, thistles and kikuya grass, but these and others may require a second application within a week to knock back any new growth.

There are a number of plant types that Weed Blast is not likely to work on, such as bamboo, broom, cooch and convolvulus – there is a more comprehensive list of plant types and application on our website – go to greenkiwiclean.nz/WeedBlast.
