**TRAVELLER RFID SAFE**

Protect your cards from illegal scans

Hackers have developed devices that is an RFID (Radio Frequency Identification) skimmer. Using these devices, a criminal only needs to be near your credit card/ passport etc. to skim information from it. Once your card has been skimmed, the information can be used to create a replicate card, or used in an identity theft operation.

Protect yourself from contactless data theft with our range of RFID Protected Products

MOQ: 100

**Customised Mobile PVC Gifts Set**

MOQ: 100

**USB Traveller Plug**

Why do you need the USB Traveller Plug?  
Problems?  
So many devices to charge!  
Checked in to the hotel room with multiple devices to charge but only one power point? Worse still, if there's two pax in the room, twice the number of devices to charge. Some even resort to getting up in the middle of the night to charge the next device. Which device to charge first? More frustration awaits when you can't reach those power points and need to shift furniture just to reach those points.

**TRAVELLER PLUG THE BUSINESS TIMES USB Traveller Plug to the rescue**

Compact new device makes multiple device charging easy while on the move

Versatility: Universal Socket accepts ALL plug types

LED Light

2.1A USB

Size: 120x85x30mm

Universal Version

**Amazon UK review** ★★★★★

This is one of the most useful items I've ever bought. Exactly as described, with a 80cm cord that wraps around (I challenge you to claim it's insufficiently long for it's explicitly intended purpose as I've yet to encounter a hotel room plug that has been problematic for this extension's length) it's an extremely useful device and I plan on buying another (EU version) in the future. It's very well made and resistant, light and compact enough and yet serves its purpose brilliantly. Being a very well designed device I can't imagine anybody who travels frequently could give it any less than 5 stars (and this is the absolute first time I write something like that). It charges iPhone just fine and as quickly as a Standard charger so I'm a bit puzzled by another reviewer's 'trickle feed' comments. I wouldn't do so lightly, but I can't recommend this traveller plug enough. Tredan is now definitely on my watch list.
