Thank you for purchasing the Kepler from Ariel Rider Ebikes™.

We take pride in bringing you a quality product that will offer years of enjoyment. Please read and understand this manual fully before assembling and riding your bike.

If you have questions after reading this manual, please reference the Ariel Rider Ebikes Help Center, contact us by email, and/or give us a call on the phone.

We’re here to help!

USING THIS MANUAL

This manual contains details of the product, its equipment, and information on operation, maintenance, and other helpful tips for owners. Read it carefully and familiarize yourself with the Kepler before using it to ensure safe use and prevent accidents. Be sure to retain this manual as your convenient Kepler information source.

This manual contains many warnings and cautions concerning the safe operation and consequences if proper setup, operation, and maintenance are not performed. All information in this manual should be carefully reviewed and if you have any questions, you should contact Ariel Rider E-bikes immediately. Users should also pay special attention to information marked in this manual beginning with an exclamation mark as below:

The notes, warnings, and cautions contained within the manual and marked by the triangular Caution Symbol at the left of this page should also be given special care. They include important safety information and information about necessary precautions that must be adhered to in order to prevent possible injury, death, property damage, or damage to the bike.
NOTICE

Because it is impossible to anticipate every situation or condition which can occur while riding, this manual makes no representations about the safe use of bikes under all conditions. There are risks associated with the use of any bike which cannot be predicted or avoided, and which are the sole responsibility of the rider.

You should keep this manual, along with any other documents that were included with your bike for future reference. However, all content in this manual is subject to change or withdrawal without notice. Ariel Rider E-bikes makes every effort to ensure the accuracy of its documentation and assumes no responsibility of liability if any errors or inaccuracies appear within. Assembly and first adjustment of your bike from Ariel Rider E-bikes requires special tools and skills and it is recommended that this should be done by a certified, reputable bike mechanic if possible.

In no event shall Ariel Rider be liable for any direct, indirect, punitive, incidental, special consequential damages, to property or life, including but not limited to physical injury, mental injury, loss of income, monetary damages, or injury to a third party, whatsoever arising out of, or connected with, the use or misuse of Ariel Rider products.

No claims, representations, or warranties, whether express or implied, including but not limited to warranties of merchantability, fitness for a particular purpose, of title, or of non-infringement of third-party rights, are made by Ariel Rider as to the safety, reliability, durability, and performance of any of Ariel Rider’s products. This includes any third party contracting you may do related to the use, repair, or unauthorized modification of Ariel Rider products.

Furthermore, Ariel Rider accepts no liability whatsoever for the safety, reliability, durability, and performance of any of Ariel Rider’s products. By buying, using, or allowing the use of Ariel Rider products, you represent and warrant that electronic bicycles can be associated with a high level of risk and YOU EXPRESSLY AND VOLUNTARILY ASSUME THE RISK OF DEATH OR OTHER PERSONAL INJURY SUSTAINED WHILE USING ARIEL RIDER PRODUCTS, WHETHER OR NOT CAUSED BY THE NEGLIGENCE OR OTHER FAULT OF ARIEL RIDER AS DETERMINED BY A COURT OF COMPETENT JURISDICTION. Your use of the product is entirely at your own risk and you have no recourse whatsoever against Ariel Rider E-bikes.

GENERAL INFO

ASSEMBLY AND FIT

Correct assembly and fit are essential elements of ensuring your bicycling safety, performance, and comfort. Even if you have the experience, skill, and tools to complete these essential steps before your first ride, Ariel Rider E-bikes recommends having a certified, reputable bike mechanic check your work.

**NOTICE:** Correct assembly and fit are essential elements of ensuring your bicycling safety, performance, and comfort. Even if you have the experience, skill, and tools to complete these essential steps before your first ride, Ariel Rider E-bikes recommends having a certified, reputable bike mechanic check your work.

**NOTICE:** A critical aspect of assembling your bike from Ariel Rider E-bikes is securing the front wheel and checking the tightness of the rear wheel axle nuts. Both wheels need to be properly secured before operating your bike, and these nuts are to be checked every 45-50 miles.

The replacement of original components or installation of third-party accessories or accessories from Ariel Rider E-bikes not explicitly recommended for your bike model, is at your own risk. Using aftermarket accessories or components that have not been tested by Ariel Rider E-bikes for safety and compatibility may void your warranty, create an unsafe riding condition, damage your bike by Ariel Rider E-bikes, or result in serious injury and/or death. Ariel Rider shall not be responsible for any and all injuries or damages resulting from the use of non-original components or spare parts.
MANDATORY EQUIPMENT AND USE LOCATIONS

Before all rides, ensure you have all required and recommended safety equipment and are following all laws pertaining to using an electric bike in your region. For example, these laws may specify the need for mandatory equipment, use of hand signals, and where you can ride.

SAFETY CHECK BEFORE EACH RIDE

Always check the condition of your bike before you ride in addition to having regular maintenance performed. If you are unsure of how to conduct a complete check of the condition of your bike before every ride, you should consult a certified, reputable bike mechanic for assistance.

Make sure to check your motor cable is not hanging, loose, and/or rubbing any of the moving parts. Failure to do so may end up damaging the motor cable, which is not repairable, and will result in needing to replace the motor itself, which is not covered under warranty.

See the PRE-RIDE SAFETY CHECKLIST for more information.
ELECTRICAL SYSTEM

The electrical system on your X-Class 52V offers various levels of power assistance and lighting for different operating conditions and user preferences. It is critical that you familiarize yourself with all aspects of your X-Class 52V’s electrical system and check to see that it is working correctly before every ride. The front and rear brake levers contain safety power cutoff switches, which disable the hub motor’s assistance when applied, and both levers should be checked for correct operation. The throttle should provide smooth acceleration when gradually applied. If the throttle, brake lever cutoff switches, pedal assistance, or lighting is not functioning normally, intermittent, or not working, please discontinue using your X-Class 52V immediately and contact the Ariel Rider E-bikes Technical Support team for assistance.

BRAKES

Ensure brakes are working correctly, all braking system components are free from damage, and properly secured. When you fully squeeze the brake levers, ensure neither the front nor rear brake levers touch the handlebar. Take your bike to a certified, reputable bike mechanic to have the brakes repaired if you find a problem.
**TIRES AND WHEELS**

Your wheels should always spin straight and must be repaired or replaced if they wobble side to side, or up and down when spinning. If your wheels become untrue or spokes loosen, do not attempt to true or tighten unless you have adequate knowledge, tools, and experience. It is recommended that a certified, reputable bike mechanic performs all wheel tuning and truing operations on your bike from Ariel Rider E-bikes. Ensure your tires and inner tubes are in good working condition without any visual damage and have the correct amount of air pressure. Always replace damaged tires and inner tubes before you ride. Tires without the correct amount of air pressure can reduce performance, increase tire and component wear, and make riding your bike unsafe.

**ACCESSORIES, STRAPS, AND HARDWARE**

Ensure all hardware is secured and all approved accessories are properly attached per the specific component manufacturer’s instructions. It is good practice to look over all hardware, straps, and accessories before each ride and if you do discover something is wrong or find something you are not sure about, please have it checked by a certified, reputable bike mechanic.
SUSPENSION, HANDLEBAR, AND GRIPS

The suspension fork on your X-Class 52V will affect the handling of the bike so you MUST understand how it works before use. Check to ensure the front wheel, handlebar, and handlebar stem are properly fastened, aligned, and fitted to the user. Ensure all hardware securing the handlebar and seat are properly tightened. Loose, worn, or damaged handlebar grips should be replaced before you ride.

BATTERY CHARGED, SECURED, AND UNPLUGGED

Ensure the battery is fully charged and is operating properly. The battery gauge on the LCD Display and battery mounted charge status indicator should read similarly. The battery MUST be locked onto the frame securely before use. Ensure the battery charger is unplugged from the battery, the power outlet, and stored in a safe location before you ride.
ASSEMBLY INSTRUCTIONS

NOTICE: The following assembly steps are only a general guide to assist in the assembly of your bike from Ariel Rider E-bikes and is not a complete or comprehensive manual of all aspects of assembly, maintenance, and repair. We recommend you consult a certified, reputable bike mechanic to assist in the assembly, repair, and maintenance of your bike. It is normal and expected for the parts to be loose out of the box, we highly recommend checking all of nuts and the bolts even if they’re already assembled on the bike itself upon delivery.

Check out the assembly video at https://youtu.be/6Lja1fabN2s

STEP 1: Unpack the bike from the carton and carefully set out all contents of the box. Remove packaging material protecting the bike frame and components. Please recycle packaging materials especially cardboard and foam (all #6 EPS foam). Ensure you have received the correct frame size before assembling the bike and that all pieces are included in the package including:

- X-Class 52V bike
- Front wheel
- Front fender
- Charger
- Warranty registration card (last page of manual),
- Headlight
- Assembly toolkit,
- Pedals
- Keys
If there are any missing parts, please contact Ariel Rider E-bikes via our ticketing system on our website.

**STEP 2: Install handlebar onto stem.**

- With the forks pointed forward (front brake caliper will be on the same side as the rear brake caliper), loosen the stem clamp bolts (on the side of the stem) and rotate the stem ½ turn clockwise from the shipping position and retighten to 10 N.m.

- Remove the faceplate from the stem.

- Make sure that the control cables from the handlebar are not twisted or wrapped around the fork when you mount them to the stem.

- When affixing the faceplate, tighten the faceplate bolts incrementally and evenly in an “X” pattern. When fully clamped down, the gap between the faceplate and the stem should be even from left to right, and from top to bottom.

- Before securing the handlebars completely, rotate the bars so that the brake levers angle downward at an angle of 40-45°. The stem angle (handlebar height) is adjustable. If the angle is adjusted, be advised to always keep the stem angle leaning forward for stability purposes. (Don’t adjust it to straight up and down!)
STEP 3: Install the front wheel components.

When properly installed, the front wheel should be fully seated in the dropouts of the front fork, and the washers and nuts should be on the outside of the fork. Tighten axle nuts to 40 Nm.

If your bike came equipped with a quick release skewer instead of a solid axle with axle nuts, install skewer snugly with the lever pointed upward, but not hitting the fork leg when it is closed. It should be snug enough that some effort is needed to open it up again.

Ensure that the front wheel is well secured before moving on to the next step.

STEP 4: Install the pedals.

It is very important to install the pedals onto the correct sides of the bike. The pedals are not identical. The threads on each are different, and they will damage the crank arms if they are installed on the wrong sides.

- With both pedals in hand, look carefully at the threaded part of each pedal. When comparing this area of the two pedals, one will have ridges and will be marked with an “L” on the end. The other one will be smooth and marked with an “R” on the end.

- This corresponds to the side of the bike they go on. The left side of the bike is the same side that has the brake calipers. The right side is the side that has the chain. It is the same as your left and right side when sitting on the bike.

- The left pedal is reverse threaded and tightens counterclockwise. Carefully thread the pedal into
the left crank arm by hand, slowly. **Do not cross thread or damage the threads.** Tighten securely using a pedal wrench to avoid damage caused by wider wrenches, as shown in assembly video.

- **The right pedal is threaded normally and tightens by turning clockwise.** Carefully thread the pedal into the right crank arm by hand, slowly. **Do not cross thread or damage the threads.** Tighten securely with a pedal wrench.

**STEP 5:** Inflate tires to recommended PSI indicated on the tire sidewall (30 psi).

- Do not over-inflate or under-inflate the tires. This is important with fat tire bikes as underinflated tires will want to pull the handlebars to one side or the other while riding.

**STEP 6:** Always check that the battery is locked to the frame before riding.

**STEP 7:** Install the headlight and front fender in place.

- Make sure the bike is not turned on while connecting the headlight as this may damage the controller.
- While plugging the headlight cable in, **align the arrows first & push the connectors together without twisting.**
- The headlight should be aimed at a slight downward angle. This is to keep from blinding other drivers and riders at night.
**STEP 8: Final checks:**

- Double check all fasteners are tightened to correct torque values.
- **Verify that the brake levers feel firm** when brakes are applied and that they do not pull back to the handlebar grips when applied.
- **If the levers can be pulled all the way back to the grips, DO NOT RIDE THE BIKE,** seek out a qualified bike mechanic, or contact Ariel Rider product support.
- Check that all the cables are secured and that nothing is going to rub on the chain or the tires.

**STEP 9: Review the remainder of the manual.**

- Once the bike has been assembled per the above instructions and the assembly video available from website read, understand, and follow the procedures outlined in the remainder of the manual before operating the bike.

**NOTICE:** If you have any questions regarding the assembly of your bike, contact Ariel Rider E-bikes. If you are not able to ensure all the assembly steps in the assembly video are performed properly, or you are unable to view the assembly video, please consult a certified, reputable local bike mechanic for assistance in addition to contacting Ariel Rider E-bikes for help.
**NOTICE:** Ensure all hardware is tightened properly following Recommended Torque Values and all safety checks in this manual are performed before the first use of the bike. Do not extend any components including the stem or seat post beyond the minimum insertion markings on the seat post or maximum angle markings on the stem which are etched into the components. Ensure that all hardware is properly tightened (to the recommended torque values included in this manual) and components are secured before moving on to next step otherwise damage to the bike, property, serious injury, or death could occur. Ariel Rider shall not be responsible for any and all injuries or damages resulting from hardware not being tightened correctly or components that are not properly assembled.

Before using the bike, always check to ensure all latches, levers, and quick releases are properly secured and undamaged. Check that they are correctly secured before every ride and after every time the bike is left unsupervised, even for a short time. Otherwise, the handlebar stem and/or seat post may come loose and can result in loss of control, damage to the bike, property, serious injury, and/or death. Ariel Rider shall not be responsible for any and all damages resulting from any latches, levers, and quick releases not being properly secured or that are damaged.
**SUSPENSION FORK**

The Kepler comes equipped with an adjustable front suspension fork, these suspension forks can move up and down up to certain degree to cushion bumps in the riding surface, which can make riding on a rough road or trail smoother and more comfortable.

The fork has two dials, one on each leg, that have two different functions.

The dial on the lefthand side adjusts the preload or firmness of the shock. Clockwise increases preload. This is to increase the firmness of the suspension.

The knob on the righthand side is a suspension lockout knob. This locks the front suspension to the current position and prevents the fork from compressing in response to uneven terrain. The tradeoff is a harsher ride in exchange for more precise handling on flat and even ground.

In most situations, it is best to leave the suspension unlocked. When locked, the suspension can no longer absorb the various impacts and vibrations encountered while riding, and as a result those forces are transferred directly to the rider. This also puts more strain on parts such as the wheels, and handlebar stem.

When turning the lockout knob, be careful not to use excessive force. The range of rotation from locked to unlocked is less than ½ of a turn. Do not try to turn any more than that or damage to the knob will result.
BATTERY CHARGING

CHARGING PROCEDURE

Follow these steps to charge your battery.

• Turn the bike off with the display.

• Remove the rubber cover on the charging port of the battery. This is located at the end of the battery that is nearest to the pedals when the battery is on the bike.

• Place the charger on a flat, secure place, and connect the 3-pin charging connector to charging port on the side of the battery. You may have to rotate until it plugs in. The design of the plug only allows it to plug in when it is aligned the correct way.

• Plug the charger into the outlet, then the charging port. Connect the charger input plug (110/220-volt plug) to the power outlet. Charging should initiate and will be indicated by the LED charge status light on the charger turning red. The indicator turns green or will remain green if the battery is fully charged.

• The LED indicator turns green or will remain green when the battery is fully charged. Disconnect the charger from the wall outlet then unplug the charger from the battery.

Always charge your battery in temperatures between 50 °F – 77 °F (10 °C - 25 °C) and ensure the battery and charger are not damaged before initiating charge. If you notice anything unusual while charging, please discontinue charging and use of the bike and contact Ariel Rider E-bikes for help.
BATTERY CHARGING INFORMATION

• Check the charger cables, charger, and battery for damage before beginning each charge.
• Always charge in dry, indoor locations away from direct sunlight, dirt, or debris.
• Charge in a clear area away from potential to trip on the charging cords or for damage to occur to the bike, battery, or charging equipment while parked and/or charging.
• The battery can be recharged on or off the bike.
• To remove the battery, turn the key to unlocked position and then carefully pull the battery to the side while you’re keeping the key in unlocked position.
• The battery should be recharged after each use, so it is ready to go the full range per charge next ride. There is no memory effect, so charging the battery after short rides will not cause damage.
• Ensure the charger is sitting upright (LED facing up) when charging. This is important to prevent the charger from overheating.
• Charging the battery fully normally takes 3-7 hours. In rare cases, it may take longer to allow the battery management system to balance the battery, particularly when the bike is new or after long periods of storage.
• Though the charger will stop charging once the battery is fully charged, it should still be unplugged from the battery and the wall after charging is complete.
• Do allow the battery to charge for more than 12 hours or leave the charging battery unattended.
Do not cover up the charger when plugged in or charging. It air cools and to be on a hard, flat surface in an open space. Use the charger with the indicator light facing upwards. Do not use with the charger inverted, which can inhibit cooling and reduce charger lifespan.

If the battery is physically damaged, non-functional, performing abnormally, or was dropped or involved in a crash, with or without obvious signs of damage, please discontinue use and charging and contact Ariel Rider E-bikes immediately. Ariel Rider shall not be responsible for any and all damages or injuries resulting from physically damaged, non-functional, abnormally preforming, or otherwise damaged batteries.

Do not open the battery housing, which will void the warranty and can result in damage to the battery, property, serious injury, and/or death. Ariel Rider shall not be responsible for any and all damages or injuries resulting from opening the battery housing.
WHEN THE BATTERY IS REMOVED

- Ensure the screen is turned off whenever it is being removed or off the bike.
- Do not touch the “+” and “-” terminal contacts on the bottom of the battery when the battery is removed from the bike.
- Be careful not to drop or damage the battery when loose from the bike.
- Be careful to avoid damaging the exposed connector terminals and keep them clear of debris.

Use caution to avoid damage to battery connector terminals, which are exposed when the battery is unlocked and removed from the frame of the bike. In the case of damage to the terminals or battery mounts, please discontinue use and contact Ariel Rider E-bikes Technical Support immediately. Ariel Rider shall not be responsible for any and all injuries or damage resulting from damaged batteries.

WHEN INSTALLING THE BATTERY ON THE BIKE

- Do not force the battery onto the receptacle; slowly align the bottom of the battery into the receptacle and push the top of the battery inside the frame.
- Ensure the battery has been properly secured to the bike before each use by carefully pulling to the left on the battery with both hands to test the security of the attachment of the battery to the mount.
- If the connector on the bike is wet from rain, blow out any water with compressed air, or allow the water to dry before reinstalling the battery.

CHARGING TIME
When charging a battery, the red charging indicator light on the charger should illuminate, indicating the battery is charging. When charging is complete, or when the battery is already charged, the light will be green.

<table>

</tr>
</tbody>
</table>

The time the charger takes to fully charge the battery is dependent on various factors including distance traveled, riding characteristics, terrain, payload, and battery age. The following table provides an estimate of charge time based on most common distances traveled in regular operation:
Notice: The battery may take longer to charge when fully depleted, when very new, and after 3-5 years of regular use. If your battery does not seem to be charging normally, taking longer to charge than expected, or you are experiencing substantial reduction in range, please discontinue use and contact Ariel Rider E-bikes immediately.

**CHARGER SAFETY INFORMATION**

- The charger should only be used indoors in a dry, ventilated area, on a flat, stable, hard surface.
- Avoid charger contact with liquids, dirt, debris, or metal objects. Do not cover the charger while in use.
- Store and use the charger in a safe place away from children and where it cannot suffer damage from falls or impact.
- Fully charge the battery before each use to ensure it is ready to go the full range per charge, to extend the life of the battery, and help reduce the chance of over-discharging the battery pack.
- Charge the battery with the charger originally supplied with the bike from Ariel Rider E-bikes, or a charger purchased directly from Ariel Rider E-bikes, designed for use with your specific bike serial number, as approved by Ariel Rider E-bikes. Never charge the battery with a different charger, which could cause damage to the battery, bike, property, injury, and/or death. Ariel Rider shall not be responsible for any and all damages or injuries resulting from the battery being charged from a different charger.
- The charger works on 110/220 V 50/60 Hz standard home AC power outlets and the charger automatically detects and accounts for incoming voltage. Do not open the charger or modify voltage...
input.

- Do not yank or pull on the cables of the charger. When unplugging, carefully remove both the AC and DC cables by pulling on the plastic plugs directly, not by pulling on the cables.

- The charger will get hot when operating as designed. If the charger becomes too hot to touch, you notice a strange smell, or any other indicator of overheating, discontinue charger use immediately and contact Ariel Rider E-bikes Technical Support.
Please take special care in charging your bike from Ariel Rider E-bikes in accordance with the procedures and safety information detailed in this manual. Failure to follow proper charging procedures can result in damage to your bike from Ariel Rider E-bikes, the battery, the charger, personal property, and/or serious injury or death. Ariel Rider shall not be responsible for any and all damages or injuries resulting from improper charging.
**LONG-TERM BATTERY STORAGE**

If storing your bike from Ariel Rider E-bikes for longer than two weeks at a time, follow the instructions below to maintain the health and longevity of your battery.

- Charge (or discharge) the battery to approximately 75% charged. (3 out of 4 lights on the battery indicator)

- Store the battery in a dry, climate controlled, indoor location between 50 °F – 77 °F (10 °C - 25°C).

- Check the battery every month, and if necessary, use the charger from Ariel Rider E-bikes to charge the battery to 75% charged. (3 out of 4 lights on the battery indicator)

- Do not store a fully charged or fully discharged battery. The battery will degrade when stored at a full charge. Especially in warm or hot climates. At the same time a depleted battery might not charge again if stored in a discharged state.

Please follow the above instructions for storing your bike and battery from Ariel Rider E-bikes. Failure to follow proper battery storage procedures can result in a non-functional battery and replacement will not be covered under warranty. Ariel Rider shall not be responsible for any and all damages or injuries resulting from improper battery storage procedures.
**OPERATION**

**NOTICE:** Do not perform any of the steps in the **OPERATION** section of this manual until you have read this entire manual, since there are important details in the following sections related to safety.

Users must become accustomed to the bike’s power control system before operating. The throttle mechanism allows full power to be activated from a stop and inexperienced users should take extra care when first applying the throttle. The pedal assistance feature is also a powerful option and users should fully research and understand how to operate it before first use. Not taking care to familiarize yourself and practice the operation of the power system on your bike from Ariel Rider E-bikes can lead to death or serious injury, please heed this warning. Ariel Rider shall not be responsible for any and all injuries or damages resulting from your improper use of an Ariel Rider E-bike.

Users must follow the instructions and warnings contained in this manual for safety. Do not attempt to operate your bike from Ariel Rider E-bikes until you have adequate knowledge of its control and operation. Damage caused by failing to follow instructions is not covered under warranty and could result in personal injury to you and others, and damage to property and/or your bike from Ariel Rider E-bikes. Contact Ariel Rider E-bikes if you have any questions about assembly or operation. Ariel Rider shall not be responsible for any and all damages or injuries resulting from your misuse of the e-bikes or for engaging in activities that go against the instructions set forth in this manual.
START UP PROCEDURE

After the bike has been properly assembled following the assembly video, all components are secured correctly, and you have read this entire manual, you may turn the bike on and select a power level following the steps outlined below:

• **Check that the battery is securely locked to the bike.**

• **Remove the key** from the battery lock if it is inserted. The key only unlocks the battery for removal and is not used to turn the bike on or off. Never ride with the key inserted.

• **Turn the bike on.** Hold down the power button on the righthand-bottom edge of the display for 1-2 seconds until power is delivered to the LCD display. Do not squeeze the brake levers while powering on as doing so will trigger an error.

• **Select your desired level of Pedal Assist** (level 0 through 5) using the up and down arrows on the display. Level 1 corresponds to the lowest level of Pedal Assist, and level 5 corresponds to the highest level of Pedal Assist. Level 0 deactivates Pedal Assist. Start with a Pedal Assist level 0 or 1 and adjust
from there.
• **To turn on the headlight**, The Headlight button is located on the light switch cluster with the turn signals. Hold down the plus “+” button on the display for approximately 2-3 seconds to illuminate the display. There is a running light that turns on whenever the bike is on. See the section *LIGHTS* for info.

• **Using the turn signals.** Move the toggle to left for left signal and right for right signal. This is only visible to those behind you and is not a replacement for proper hand signaling. See the section *LIGHTS* for info.

• **Begin riding carefully.** With the proper safety gear, rider knowledge, and understanding you may now proceed to operate your bike from Ariel Rider E-bikes. You can begin by pedaling the bike in the appropriate drivetrain gear with pedal assist level 0 or 1. You may also use the throttle to accelerate and maintain your desired speed.

• **The throttle** is used by carefully rotating the throttle backwards towards the rider. Do not use the throttle unless you are on the bike.

Even if you are an experienced bike user, please take the time to read and implement the guidelines described in the owner’s manual accompanying your X-Class 52V, and the manuals included with each subcomponent.

Users must become accustomed to the bike’s power control system before operating. The throttle mechanism allows full power to be activated from a stop and inexperienced users should take extra care when first applying the throttle. The pedal assistance feature is also a powerful option and users should fully research and understand how to operate it before first use. Not taking care to familiarize yourself and practice the operation of the power system on your bike from Ariel Rider E-
bikes can lead to death or serious injury, please heed this warning.
**LCD DISPLAY CONTROLS**

The display is controlled using the 3-button LCD Display Remote mounted on the left side of the handlebar (depicted at right). Display Operations table in this manual for instructions on how to perform various operations using these buttons and, when applicable, other components of the bike.
### NOTICE

Holding down the minus “-“ key while the bike is powered on will cause the motor to activate at low speed. This is called “pedestrian mode” useful for walking the bike up steep hills or through difficult terrain. Do not use pedestrian mode for walking a bike that has a mechanical issue or flat tire, as further damage could result.

### BUTTON FUNCTIONS

<table>
<thead>
<tr>
<th>Button</th>

</table>
**POWERING ON THE DISPLAY/BIKE**

*WARNING:* Once the bike is on, take care not to activate the throttle or crank the pedals unless you are ready to go forward. If you are walking the bike, especially around others or in crowds, or walking it indoors, you should FIRST TURN THE BIKE OFF to prevent inadvertent activation of the throttle and subsequent loss of control of the bike, which could lead to possible injury to yourself or others, or damage to the bike or property.

Press and hold the Power button for 2 seconds to turn on the display. The bike is now powered on.
**INTERFACE**

The display shows the rider different information depending on which mode is selected. To change the display mode briefly press the **key to** cycle through the three display layouts.

**LAYOUT 1:**

![Display Interface Image](image-url)
**LAYOUT 2:**

- Battery indicator
- Real-time speed
- Speed Unit
- Real-time motor power
- Trip
- Cycling time
- Calorie burnt
- Assist
- Trip Dist.
- 0.0 KM
LAYOUT 3:

- Battery indicator
- Trip time
- Max speed
- Odometer
- Real-time Speed Unit
**PEDAL ASSIST LEVEL SWITCH:**

When not using the throttle of the bike, the motor still delivers power when you are pedaling. This is known as Pedal Assist. The amount of assistance (power) that is delivered by the motor is dependent on the Pedal Assist level that you have chosen, shown on the display as “Assist”.

You may choose 6 different levels of assist from 0-5. These assist levels limit the wattage that the motor will deliver when not using the throttle. The assist level that is set does not limit motor power while using the throttle. Even when setting the Pedal Assist to 0 (no pedal assistance), full power is still available by the throttle.

To maximize range between charges, it is recommended to use a low level of Pedal Assist to supplement your own pedaling. High levels of Assist, and/or constant throttle usage will reduce the range between charges considerably.
If there is a problem detected with the motor system, Kepler will show a warning icon along with an error code at the bottom of the screen. If you see this icon the control system will not allow the motor to function. Contact our technical support team and we will be happy to assist you with the issue. The description of each error code is given in the following table:

<table>
<thead>
<tr>
<th>Error</th>
<th>Basic Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>21</td>
<td>Controller current limit exceeded</td>
</tr>
<tr>
<td>22</td>
<td>Throttle signal</td>
</tr>
<tr>
<td>23</td>
<td>Motor phase circuit</td>
</tr>
<tr>
<td>24</td>
<td>Motor hall circuit</td>
</tr>
<tr>
<td>25</td>
<td>Brake signal error</td>
</tr>
<tr>
<td>30</td>
<td>Communication error to display</td>
</tr>
</tbody>
</table>
ADJUSTING SETTINGS:

There are some options that can be changed under the settings menu. The settings menu can only be accessed when the bike is stationary. To access it, long press the + and - buttons for 2 seconds. Make sure both buttons are pressed so that you don’t accidentally activate Pedestrian Mode. You will be presented with the following screen, which will allow you to:

- Clear the trip data,
- Turn on/off auto headlight functions,
- Set the unit of measure (MPH, KPH),
- Set the brightness of the screen backlight,
- Set auto power-off time.
- Connect your phone to the Bluetooth App.
TO CONNECT TO THE BLUETOOTH APP:

1. Select “Connect to APP” to bring up a QR code which can be used to download the mobile app which can communicate with the display.
BEST PRACTICES FOR MOTOR LONGEVITY

Notice: It is recommended that users pay close attention and ride within the following limitations to ensure the hub motor does not overheat or become damaged from excessive loading.

• To ensure adequate airflow to cool the electric components, keep the bike moving over 10 mph, or under 500 watts. This is especially important when going uphill when using the throttle and/or at high Pedal Assist levels.

• Pedal to assist the motor when accelerating from a stop and climbing hills.

• Do not climb hills steeper than 15% in grade.

• Avoid sudden starts and stops.

• Accelerate slowly.
MAXIMIZING RANGE

The range of your bike from Ariel Rider E-bikes is the distance the bike will travel on a single full charge of the onboard battery pack. The range values in this manual are estimates based on Ariel Rider E-bikes expected usage characteristics. Some of the factors which effect range include changes in elevation, speed, payload, acceleration, number of starts and stops, and ambient air temperatures. Tire pressure and terrain are also important variables to consider.

We suggest that you select a lower assistance level when you first get your bike from Ariel Rider E-bikes to get to know your bike and travel routes. Once you become familiar with the range requirements of your travel routes and the capabilities of your bike from Ariel Rider E-bikes, you can then adjust your riding characteristics if you so desire.
MAXIMUM PAYLOAD/CAPACITY

The total maximum weight limit, or payload capacity, of the Kepler (320 lbs) includes the weight of the rider as well as clothing, riding gear, cargo, accessories, a passenger, etc.

You MUST hold onto the bike whenever loading cargo and/or a passenger. The kickstand is not designed to be used for loading cargo. Do not assume the bike is stable and balanced when using the kickstand. Always hold onto the bike when cargo is being loaded, in place, or attached to the bike by Ariel Rider E-bikes. Ariel Rider shall not be responsible for any and all injuries or damages resulting from cargo being loaded, in place, or attached to an Ariel Rider E-bikes.

CARRYING CARGO

Carrying a cargo load involves additional risks, which require special attention and care to mitigate and manage. Braking, acceleration, and balancing are all significantly affected by the addition of cargo loaded on the bike. You must become accustomed to the braking, steering, and operational adjustments required to safely operate the bike with cargo. Users should practice riding on a flat and open area with light cargo before attempting to carry heavier loads.

Ariel Rider shall not be responsible for any and all injuries or damages resulting from carrying cargo on an Ariel Rider E-Bike, regardless of whether or not the cargo is properly attached, placed, or loaded onto the bike, carrying cargo is a high-risk activity in any scenario and therefore you assume the risk of all potential injuries or damages that may occur and absolve Ariel Rider of all liability associated with that risk.
Follow these important tips for the safe operation of the Kepler when used for carrying cargo:

• Cargo should be loaded as low as possible to lower the center of gravity and improve stability, but cargo should not interfere with any moving components or the ground.

• Ensure your loads are properly secured and periodically check that nothing loosens, risks interfering with any moving components, or could risk touching or dragging on the ground.

• Plan your route accordingly since a rider’s hill climbing ability, steering, and braking are all impacted when cargo is loaded on the Kepler. Hills that are normally easy to climb and descend without cargo can become challenging and dangerous once cargo is loaded onto the bike.

• Become proficient at controlling the Kepler with the cargo load in a flat and open area before riding on roads or hills.

Do not use the front brake by itself. Use both brakes for all braking operations. Braking with only the front brake can cause excessive stress on components, damage to the bike and parts, and/or loss of control. Ariel Rider shall not be responsible for any and all damages or injuries resulting from using the front brake by itself or for any excessive stress that is placed on the components, damages occurring to the bike or parts, and/or damages or injuries that occur from loss of control.

The kickstand is not designed to be used for loading cargo or child seats. You MUST hold onto the bike whenever loading cargo, especially when loading precious cargo and children. Do not assume the bike is stable and balanced when using the kickstand, always hold onto the bike when cargo is
PARKING, STORAGE, AND TRANSPORT

Please follow these basic parking, storage, and transport tips to ensure your bike is well cared for on and off the road. Ariel Rider shall not be responsible for any and all injuries or damages resulting from improper parking, storage, and/or transport.

• When pushing or carrying the bike manually, turn off the power to avoid accidental acceleration from the motor.
• Power off the bike when you are done riding.
• Ensure the battery is locked or remove the battery and bring it with you for security. Only use the key when removing the battery and do not leave it in the lock, always take the key with you or put it somewhere safe while riding.
• It is recommended to park indoors. If you must park outdoors in rain or wet conditions, you should only leave your bike from Ariel Rider E-bikes outside for a few hours and proceed to park the bike in a dry location afterwards to allow all the systems to dry out. Much like a regular bike, use in wet conditions mandates a more frequent maintenance schedule to ensure your bike does not become rusty, corroded, and to ensure all systems are always working safely.
• In public places, your bike from Ariel Rider E-bikes must be parked in accordance with local rules and regulations.
• Locking up your bike is recommended to ensure your bike is secure and the chance of theft is reduced. Ariel Rider E-bikes makes no claims or recommendations on the proper lock hardware or procedures to secure your bike, but we do recommend you take the appropriate precautions to keep your bike from Ariel Rider E-bikes safe from theft.
• Do not park, store, or transport your bike from Ariel Rider E-bikes on a rack not designed for the bike’s size and weight.

• When storing your bike or carrying your bike on a rack for transport, remove the battery pack to reduce the weight of the bike, make lifting and loading easier, and to protect the battery by transporting in the cab of a vehicle.

• Avoid transporting Ariel Rider E-bikes on a vehicle rack during rain, as this may cause water damage to the electrical components. Contact Ariel Rider E-bikes Technical Support if you have questions about preventative measures.

• In hot weather, do not leave the battery in direct sunlight. Park in the shade or take the battery indoors and preferably somewhere climate controlled.

• Never store the battery in a fully charged state, especially in hot climates. Run the battery down to 50-75% before storing it.

• Never store the bike with a depleted battery. Charge the battery to 50-75% before storing it.

• Check the battery once a month when possible and give the battery a brief charge if it has fallen below 50%.
MAINTENANCE

BASIC BIKE CARE

To ensure safe riding conditions you must properly maintain your bike from Ariel Rider E-bikes. Follow these basic guidelines and see a certified, reputable bike mechanic at regular intervals to ensure your bike is safe for use and fun to ride. See the Pre- Ride Safety Checklist and Recommended Service Intervals sections below for more detailed information.

• Properly maintain batteries by keeping them fully charged when between uses of up to two weeks apart. See the LONG-TERM STORAGE section of this manual for information on storing the battery for longer than two weeks between rides.

• Never immerse or submerge the bike or any components in water or liquid as the electrical system may be damaged.

• Periodically check wiring and connectors to ensure there is no damage and the connectors are secure.

• To clean, wipe the frame with a damp cloth. If needed, apply a mild non-corrosive detergent mixture to the damp cloth and wipe the frame. Dry by wiping with a clean, dry cloth.

• Store under shelter; avoid leaving the bike in the rain or exposed to corrosive materials. If exposed to rain, dry your bike afterwards and apply anti-rust treatment to chain and other unpainted steel surfaces.
• Riding on the beach or in coastal areas exposes your bike to salt, which is very corrosive. Wipe down your bike frequently and wipe or spray all unpainted parts with anti-rust treatment. Damage from corrosion is not covered under warranty so special care should be given to extend the life of your bike when used in coastal areas or areas with salty air or water.

• If the hub and bottom bracket bearings have been submerged in water or liquid, they should be taken out and re-greased. This will prevent accelerated bearing deterioration.

• If the paint has become scratched or chipped in the metal, use touch up paint to prevent rust. Clear nail polish can also be used as a preventative measure.

• Regularly clean and lubricate all moving parts, tighten components, and adjust as required.

• The Kepler comes equipped with a fender set, which should be inspected to ensure mounting hardware is properly secured and these parts are in good working condition.
TIRE INFLATION AND REPLACEMENT

The Kepler employs 26” x 4” rubber tires with inner tubes. The tubes use Schrader valves to adding/reducing air pressure. The tires are designed for durability and safety for regular cycling activities and the tires need to be checked before each use for proper inflation and condition. Proper inflation, care, and timely replacement will help to ensure that your bike’s operational characteristics will be maintained, and unsafe conditions avoided. Please avoid using motorcycle tires and/or different size tires.

It is critically important that proper air pressure is always maintained in pneumatic tires. Do not under-inflate or over-inflate your tires. Low pressure may result in loss of control, and overinflated tires may burst. Failure to always maintain the air pressure rating indicated on pneumatic tires may result in tire and/or wheel failure. Ariel Rider shall not be responsible for any and all damages or injuries resulting from under-inflating or over-inflating tires.

Inflate your tires from a regulated air source with an available pressure gauge. Inflating your tires from an unregulated air source could over-inflate them, resulting in a burst tire.

When changing a tire or tube, ensure that all air pressure has been removed from the inner tube prior to removing tire from the rim. Failure to remove all air pressure from the inner tube could result in serious injury. Ariel Rider shall not be responsible for any and all damages or injuries resulting from not removing all air pressure from the inner tube or from incorrectly changing the tire or tube.

Using aftermarket tires or inner tubes, not provided by Ariel Rider E-bikes may void your warranty, create an unsafe riding condition, or damage to your bike from Ariel Rider E-bikes. If required by
law, ensure replacement aftermarket tires have sufficient reflective sidewall striping.
**PRE-RIDE SAFETY CHECKLIST**

*Notice:* Before each ride, and after every 25-45 miles, we strongly advise following the pre-ride safety checklist in the table below.

<table>
<thead>
<tr>
<th>Safety Check</th>
<th>✓ Basic Steps</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Brakes</td>
<td>✓ Ensure front and rear brakes work properly.</td>
</tr>
<tr>
<td></td>
<td>✓ Check brake pads for wear and ensure they are not over-worn.</td>
</tr>
<tr>
<td></td>
<td>✓ Ensure brake pads are correctly positioned in relation to the rims.</td>
</tr>
<tr>
<td></td>
<td>✓ Ensure brake control cables are lubricated, correctly adjusted, and display no obvious wear.</td>
</tr>
<tr>
<td></td>
<td>✓ Ensure brake control levers are lubricated and tightly secured to the handlebar.</td>
</tr>
<tr>
<td></td>
<td>✓ Test brake levers are firm and that brake, motor cutoff functions, and brake light is functioning properly.</td>
</tr>
</tbody>
</table>
| 2. Wheels and Tires | ✓ Ensure tires are inflated to within the recommended limits displayed on the tire sidewalls and holding air.  
✓ Ensure tires have good tread, have no bulges or excessive wear, and are free from any other damage.  
✓ Ensure rims run true and have no obvious wobbles, dents, or kinks.  
✓ Ensure all wheel spokes are tight and not broken.  
✓ Check axle nuts and front wheel quick release to ensure they are tight. Ensure the locking lever on the quick release skewer (if any) is correctly tensioned, fully closed, and secure position. |
| 3. Steering | ✓ Ensure handlebar and stem are correctly adjusted and tightened and allow proper steering.  
✓ Ensure the handlebar is set correctly in relation to the forks and the direction of travel. |
| 4. Chain | ✓ Ensure the chain is oiled, clean, and runs smoothly.  
✓ Extra care is required in wet, salty/otherwise corrosive, or dusty conditions |
| 5. Bearings | ✓ Ensure all bearings are lubricated, run freely, and display no excess movement, grinding, or rattling.  
✓ Check headset, wheel bearings, pedal bearings, and bottom bracket bearings. |
| 6. Cranks and Pedals                                      | ✓ Ensure pedals are securely tightened to the cranks.  
|                                                          | ✓ Ensure the cranks are securely tightened and are not bent.  |
| 7. Derailleurs                                           | ✓ Check that the derailleur is adjusted and functioning properly.  
|                                                          | ✓ Ensure shifter and brake levers are attached to the handlebar securely.  
|                                                          | ✓ Ensure all brake and shift cables are properly lubricated.  |
| 1. Frame, Fork, and Seat                                 | ✓ Check that the frame and fork are not bent or broken.  
|                                                          | ✓ If either frame or fork are bent or broken, they should be replaced.  |
| 9. Motor Drive Assembly and Throttle                     | ✓ Check the motor cable for any damages and or hanging loose motor cables,  
|                                                          | ✓ Ensure hub motor is spinning smoothly and motor bearings are in good working order.  
|                                                          | ✓ Ensure all power cables running to hub motor are secured and undamaged.  
|                                                          | ✓ Make sure the hub motor axle bolts are secured and all torque arms and torque washers are in place.  |
| 10. Battery Pack                                         | ✓ Ensure battery is charged before use.  
|                                                          | ✓ Ensure there is no damage to battery pack.  
|                                                          | ✓ Lock battery to frame and check to see that it is secured.  
|                                                          | ✓ Charge and store bike and battery in a dry location, between 50-80 degrees Fahrenheit. Let bike dry completely before using again.  |
Your cables, spokes, and chain will stretch after an initial break-in period of 50-100 mi (80-160 km), and bolted connections can loosen. Always have a certified, reputable bike mechanic perform a tune-up on your Kepler after your initial break-in period of 50-100 mi (80-160 km) (depending on riding conditions such as total weight, riding characteristics, and terrain).

| 11. Electrical Cables | ✓ Look over connectors to make sure they are fully seated, free from debris or moisture.  
| ✓ Check cables and cable housing for obvious signs of damage.  
| ✓ Ensure headlight, taillight, and brake light are functioning, adjusted properly, and unobstructed. |
| 12. Accessories | ✓ Ensure all reflectors are properly fitted and not obscured.  
| ✓ Ensure all other fittings on bike are properly secured and functioning.  
| ✓ Inspect helmet and other safety gear for signs of damage.  
| ✓ Ensure rider is wearing helmet and other required riding safety gear.  
| ✓ Ensure mounting hardware is properly secured if fitted with rear rack.  
| ✓ Ensure taillight and taillight power wire are properly secured if fitted with rear rack.  
| ✓ Ensure fender mounting hardware is properly secured if fitted with fenders.  
| ✓ Ensure there are no cracks or holes in fenders if fitted with fenders. |
**RECOMMENDED SERVICE INTERVALS**

Regular inspection and maintenance are key to ensure bikes from Ariel Rider E-bikes function as intended, and to reduce wear and tear on their systems. Recommended service intervals are meant to be used as guidelines. Real world wear and tear, and the need for service, will vary with conditions of use. We generally recommend inspections, service, and necessary replacements be performed at the time or mileage interval that comes first in the following table.

<table>
<thead>
<tr>
<th>Interval</th>
<th>Inspect</th>
<th>Service</th>
<th>Replace</th>
</tr>
</thead>
<tbody>
<tr>
<td>Weekly, 100-200 miles</td>
<td>Check hardware for proper torque: See Recommended Torque Values chart. Check drivetrain for proper alignment and function (including the chain, freewheel, chainring, and derailleur). Check wheel trueness and for quiet wheel operation (without spoke noise). Check condition of frame for any damage.</td>
<td>Clean frame by wiping frame down with damp cloth. Use barrel adjuster(s) to tension derailleur/brake cables if needed.</td>
<td>Any components confirmed by Ariel Rider E-bikes Technical Support or a certified, reputable bike mechanic to be damaged beyond repair or broken.</td>
</tr>
</tbody>
</table>
| Monthly, 250-750 miles | Check brake pad alignment, brake cable tension.  
Check bike is shifting properly, proper derailleur cable tension.  
Check chain stretch.  
Check brake and shifter cables for corrosion or fraying.  
Check spoke tension.  
Check accessory mounting (rack mounting bolts, fender hardware, and alignment). | Clean and lubricate drivetrain.  
Check crankset and pedal torque.  
Clean and optionally lubricate brake and shift cables.  
True and tension wheels if any loose spokes are discovered. | Replace brake and shift cables if necessary.  
Replace brake pads if necessary. |
| Every 6 Months, 750-1250 miles | Inspect drivetrain (chain, chainring, freewheel, and derailleur).  
Inspect all cables and housings. | Standard tune-up by certified, reputable bike mechanic is recommended.  
Grease bottom bracket. | Replace brake pads.  
Replace tires if necessary.  
Replace cables and housings if necessary. |
### TROUBLESHOOTING

<table>
<thead>
<tr>
<th>Symptoms</th>
<th>Possible Causes</th>
<th>Most Common Solutions</th>
</tr>
</thead>
</table>
| 1 It doesn’t work                             | 1. Insufficient battery power  
2. Faulty connections  
3. Battery not fully seated in tray  
4. Improper turn on sequence  
5. Brakes are applied                         | 1. Charge the battery pack  
2. Clean and repair connectors  
3. Install battery correctly  
4. Turn on bike with proper sequence  
5. Disengage brakes                          |
| 2 Irregular acceleration and/or reduced top speed | 1. Insufficient battery power  
2. Loose or damaged throttle               | 1. Charge or replace battery  
2. Replace throttle                        |
| 3 When powered on the motor does not respond | 1. Loose wiring  
2. Loose or damaged throttle  
3. Loose or damaged motor plug wire  
4. Damaged motor  
5. Throttle switch is OFF (if equipped) | 1. Repair and or reconnect  
2. Tighten or replace  
3. Secure or replace  
4. Repair or replace  
5. Press button on throttle to enable        |

WARNINGS & SAFETY

Notice: It is recommended that users pay special attention to all the general operating rules below before operating their bike from Ariel Rider E-bikes. Ariel Rider shall not be responsible for any and all injuries or damages resulting from failing to adhere to all general operating guidelines before, during, and/or after operating your Ariel Rider E-Bike.

• When riding, obey the same road laws as all other road vehicles as applicable by law in your area.
• For additional information regarding traffic/vehicles laws, contact the road traffic authority in your area.
• Ride predictably, in a straight line, and with the flow of traffic. Never ride against traffic.
• Use correct hand signals to indicate turning.
• Ride defensively; to other road users you may be hard to see.
• Concentrate on the path ahead. Avoid potholes, gravel, wet or oily roads, wet leaves, curbs, train tracks, speed bumps, drain gates, thorns, broken glass, and other obstacles, hazards, and puncture flat risks.
• Cross train tracks at a 90-degree angle or walk your bike across.
• Expect the unexpected such as opening car doors or cars backing out of driveways.
• Be careful at intersections and when preparing to pass other vehicles or other cyclists.
• Familiarize yourself with all the features and operations of the bike by Ariel Rider E-bikes. Practice and become proficient at shifting gears, applying the brakes, using the power assist system, and using the throttle in a controlled setting before riding in riskier conditions.
SAFETY NOTES

The following safety notes provide additional information on the safe operation of your bike from Ariel Rider E-bikes and should be closely reviewed. Failure to review these notes can lead to serious injury or death. Ariel Rider shall not be responsible for any and all damages or injuries resulting from your misuse of Ariel Rider E-bikes, including but not limited to the examples of misuse set forth below.

• All users must read and understand this manual before their first use of the bike from Ariel Rider E-bikes. Additional manuals for components used on the bike may also be provided and should be read before use in addition to this manual.

• Ensure that you comprehend all instruction and safety notes/warnings.

• Ensure the bike fits you properly before your first use. You may lose control or fall if your bike is too big or too small.

• Always wear an approved bicycle helmet whenever using this product and ensure that all helmet manufacturer instructions are used for fit and care of your helmet. Failure to wear a helmet when riding may result in serious injury or death.

• Ensure correct setup and tightening is performed on your bike before first using it and check the setup, tightening, and condition regularly.

• It is your responsibility to familiarize yourself with the laws and requirements of operating this product in the area(s) where you ride.

• Ensure the handlebar grips are undamaged and properly installed. Loose or damaged grips can cause you to lose control and fall.
• Do not use this product with standard bike trailers, stands, vehicle racks, or accessories that Ariel Rider E-bikes has not tested for safety and compatibility and have verified as safe and compatible with the bike. Contact Ariel Rider E-bikes to check if your equipment will work with the bike.

• Off-roading on Ariel Rider E-bikes is absolutely prohibited, and Ariel Rider shall not be responsible for any and all injuries or damages resulting from off-roading.

• Engaging in extreme riding is extremely dangerous and should be avoided. Although many articles/ advertisements/catalogs depict extreme riding, this is not recommended nor permitted, and you can be seriously injured or killed if you perform extreme riding. Ariel Rider shall not be responsible for any and all injuries or damages resulting from extreme riding.

• Bikes and bike parts have strength and integrity limitations, and extreme riding should not be performed as it can damage bike components and/or cause or lead to dangerous riding situations in which you may be seriously injured or killed.

• Failure to perform and confirm proper installation, compatibility, proper operation, or maintenance of any component or accessory can result in serious injury or death.

• After any incident, you must consider your bike unsafe to ride until you consult with a certified, reputable bike mechanic for a comprehensive inspection of all components, functions, and operations of the bike.

• Failure to properly charge, store, or use your battery will void the warranty and may cause a hazardous situation.

• You should check the operation of the brake motor cutoff switches before each ride. The brake system is equipped with an inhibitor which cuts off power to the electric motor whenever the brakes are engaged. Check proper operation of brake motor cutoff switches before riding.
• Extreme care should be taken when using the pedal assistance sensor and throttle on this product. Ensure you understand and are prepared for the power assistance to engage as soon as pedaling is underway.

• Users must understand the operation of the twist throttle and pedal assistance sensors before using the bike and take ample care in their usage in respect to traveling at speeds appropriate for the usage area, riding conditions, and user experience level. Always use the lowest assist level until you are comfortable with the bike and feel confident in controlling the power.

• Any aftermarket changes to your bike from Ariel Rider E-bikes not expressly approved by Ariel Rider E-bikes could void the warranty and create an unsafe riding experience. Ariel Rider shall not be responsible for any and all damages or injuries resulting from after-market changes to your e-bike.

• Because electric bikes are heavier and faster than normal bikes, they require extra caution and care while riding.

• Take extra care while riding in wet conditions. Feet or hands can slip in wet conditions and lead to serious injury from a fall or death.

• Do not remove any reflectors or the bell.
HELmets

It is REQUIRED that all riders wear a properly fitting ANSI or SNELL approved bicycle safety helmet when riding your bike.

Always wear a properly fitted helmet which covers the forehead when riding a bike. Many locations require specific safety devices. It is your responsibility to familiarize yourself with the local laws, rules and regulations where you ride and to comply with all applicable laws, including properly equipping yourself and your bike as the law requires. Ariel Rider shall not be responsible for any and all injuries or damages resulting from not wearing a helmet. You are REQUIRED to wear a helmet and you assume the risk of all injuries or damages resulting from refusing to protect yourself from head or neck injuries caused from not wearing a helmet.
GENERAL WARNINGS

Read and understand all sections of this entire manual before operating the bike for the first time. There are important safety warnings throughout the whole manual that must be followed to prevent dangerous situations, accidents, and possible injury and/or death. Ariel Rider shall not be responsible for any and all damages or injuries resulting from your use of the Ariel Rider E-bikes.

Like any sport, bicycling involves risk of damage, injury, and death. By choosing to ride a bike, you assume the responsibility for that risk, so you need to know, and practice, the rules of safe and responsible riding and the proper use and maintenance of this bike. Proper use and maintenance of your bike reduces risk of damage, injury, and death.

Biking and controlled substances do not mix. Never operate a bike while under the influence of alcohol, drugs, or any substance or condition that could impair motor functions, judgement, or the ability to safely operate a bike/vehicle.

The Kepler is designed for use by persons 18 years old and older. Riders must have the physical condition, reaction time, and mental capability to ride safely and manage traffic, road conditions, sudden situations, and respect the laws governing electric bike use where they ride, regardless of age. If you have an impairment or disability such as a visual impairment, hearing impairment, physical impairment, cognitive/language impairment, or a seizure disorder, consult your physician before riding any bike.
WET WEATHER

Avoid riding in wet weather whenever possible. Ride in wet weather only if necessary.

This electric bike is not meant for use in puddles, heavy rain, or streams. Never immerse or submerge this product in water or liquid as the electrical system may be damaged.

• In wet weather you need to take extra care when operating this bike.
• Decrease riding speed to help you control the bike in slippery conditions.
• Brake earlier to give yourself plenty of room to stop. The tires can not grip the road as well, requiring less braking force to put a tire into a skid. If the front tire loses grip, the most likely outcome is a crash.
• Take care to be more visible to others on the road. Wear reflective clothing and use approved safety lights.
• Road hazards are more difficult to see when wet; proceed with caution.
NIGHT RIDING

Avoid riding at night whenever possible. Ride at night only if necessary.

• Wear reflective and light-colored clothing.
• Slow down and use familiar roads with street lighting, if possible.
• Ensure tire wall, pedal, and other reflectors are installed and unobstructed.
• Ensure head light and taillight/brake light are functioning correctly and use them.

A NOTE FOR PARENTS AND GUARDIANS

As a parent/guardian, you are responsible for the activities and safety of your child. The Kepler is not designed for use by children. The Kepler is not designed for use with child seats, or passengers.
CONSUMER MISUSE

Ariel Rider waives any and all liability for injuries resulting from consumer misuse of an Ariel Rider Electric Bicycle ("bike"). The subsequent information provides consumer use requirements pursuant to e-bike state laws, however the stated requirements are not exhaustive and merely serves as a reference for misuse which Ariel Rider shall accept no liability for.

For those residing in the state of Washington, you must comply with RCW 46, which provides that:

a. You must ride the Bike on sidewalks unless there is no alternative way to travel;
b. You shall not operate the Bike on fully controlled limited access highways;
c. You shall not tamper with or modify the Bike so as to change its speed capability;
d. You shall not operate a Class C Bike if You are under 16 years old;
e. You shall not operate a Class 3 Bike on a shared-use path, except where local jurisdictions may allow the use of Class 3 electric-assisted bicycles;
f. You shall not operate the Bike where motorized vehicles are prohibited;
g. You shall not ride the Bike on a trail that is specifically designated as nonmotorized and that has a natural surface tread that is made by clearing and grading the native soil with no added surfacing materials.

Moreover, pursuant to RCW 7.72 and applying to those residing in Washington, Ariel Rider shall not be liable for injuries resulting from the fault of the manufacturer in any scenario, including but not limited to (1) if there is no solvent manufacturer subject to service of process under the laws of the claimant's domicile or the state of Washington, (2) if the court determines that it is highly probable that the claimant would be unable to enforce a judgment against any manufacturer, (3) if Ariel Rider provides plans or specifications for the manufacture or preparation of the product and such plans or specifications were a proximate cause of the defect in the product, or (4) if the Bikes are marketed under a trade or brand name of Ariel Rider.
For those residing in the state of Texas, You must comply with Texas Transportation Code Sec. 551, which provides that:

a. You shall not ride the Bike only on or astride a permanent and regular seat attached to the Bike;

b. You shall not use the Bike to carry more persons than the Bike is designed or equipped to carry;

c. You shall not use the Bike to carry an object that prevents the person from operating the Bike with at least one hand on the handlebars of the bicycle;

d. You shall not attach either the person or the Bike to a streetcar or vehicle on a roadway;

e. You shall not impede the normal and reasonable flow of traffic on the roadway when You and someone else are riding next to each other;

f. You shall not operate the Bike nighttime unless the bicycle is equipped with the safety equipment designated in Sec. 551.104(b)(1)-(2);

g. You shall not operate the Bike unless the electric motor disengages or ceases to function either (1) when You stop pedaling or (2) when the brakes are applied;

h. You shall not operate a Class 3 Bike unless You are at least 15 years of age;

i. If You are operating the Bike on a roadway and are moving slower than the other traffic on the roadway, You shall ride as near as practicable to the right curb or edge of the roadway, unless the exceptions in Sec. 551.103(a)(1)-(4) apply.

Moreover, pursuant to TX CIV PRAC & REM §82.003 and applying to those residing in Texas, Ariel Rider shall not be liable for any product liability action due to the fact that electronic bicycles are products known to be unsafe by the ordinary consumer who consumes the product with the ordinary knowledge common to the community.
For those residing in the state of California, You must comply with AB-1096, which provides that:

a. You shall not operate the Bike on a bicycle path or trail, bikeway, bicycle lane, equestrian trail, or hiking or recreational trail, unless it is within or adjacent to a roadway or unless the local authority or the governing body of a public agency having jurisdiction over the path or trail permits, by ordinance, that operation;

b. You shall not operate a Class 3 Bike if You are under 16 years of age;

c. You shall not operate a Class 3 Bike or ride as a passenger unless wearing a properly fitted and fastened bicycle helmet that meets the requirements set forth in AB 1096 Section 21213;

d. You shall not tamper with or modify the Bike so as to change the speed capability of the Bike, unless You appropriately replace the label indicating the Classification required in subdivision (c) of Section 312.5.

For those residing in the state of Colorado, You must comply with C.R.S. 42-4, which provides that:

a. You shall not use the Bike to carry more persons at one time than the number for which it is designed or equipped;

b. You shall not attach Yourself to any motor vehicle upon a roadway;

c. You shall not ride next to another electronic bike operator except on paths or parts of roadways set aside exclusively for bicycles;

d. You shall not ride a Class 3 Bike upon any street, highway, or bike or pedestrian path if You are under 16 years of age, unless You are a passenger;

e. You shall ride in the right-hand lane when operating on a roadway at less than the normal speed of traffic, subject to the conditions in Section 42-4-1412(5)(a);

f. You shall keep at least one hand on the handlebars at all time;

g. You shall comply with the parking requirements of Section 42-4-1412(11);
h. You shall wear a bicycle helmet if You are under 18 years of age, and
   a. That helmet shall must conform to the specifications in Section 42-4-1412(15)(b)(II)
   b. That helmet must be secured properly on Your head with a chin strap while the Class 3 Bike is in motion.
Moreover, pursuant to CO Rev. Stat. §13-21-402.5 and applying to those residing in Colorado, Ariel Rider shall not be liable for injury, death, or property damage that occurs as a result of use in a manner or for a purpose other than that which was intended and which could not reasonably have been expected, with such misuse as the cause of the injury, death, or property damage.

For those residing in the state of Illinois, You must comply with SB 0396 Sec. 11, which provides that:
   a. You must operate a Class 2 Bike in a manner so that the electric motor is disengaged or ceases to function when the brakes are applied;
   b. You must operate a Class 1 and Class 3 Bike in a manner so that the electric motor is disengaged or ceases to function when You stop pedaling;
   c. You shall not operate a low-speed Bike on a sidewalk;
   d. You shall not operate a Class 3 Bike if You are under 16 years of age; however, You may ride as a passenger.
Moreover, pursuant to IL ST CH 735 §5/13-213 and applying to those residing in Illinois, Ariel Rider shall not be liable for injury or damages claimed to have resulted from an alteration, modification, or change of the Bike, when that injury or damage is claimed to have resulted from said alteration, modification, or change of the Bike.

For those residing in the state of New Jersey, You must comply with N.J.S. §39:4-14.16, which provides that:
a. You shall not tamper with or modify a low-speed Bike so as to change the motor-powered speed capability or engagement of a low-speed electric bicycle, unless You appropriately replace the label indicating the Classification required in subsection b. of N.J.S. §39:4-14.16;

b. You shall not operate the Bike on a trail designated for non-motorized traffic if such trail has a natural surface tread made by clearing and grading the soil and no surfacing materials have been added;

c. You may not park the Bike on the sidewalk so as to impede the normal movement of pedestrian or other traffic upon the sidewalk.

Moreover, pursuant to NJ Rev Stat §2a:58C-3 and applying to those residing in New Jersey, Ariel Rider shall not be liable for avoidably or unavoidably unsafe aspects of the Bike, regardless of whether or not Ariel Rider provides adequate warning or instruction. Ariel Rider shall not be responsible for injuries resulting from unsafe aspects of the Bikes, regardless of whether or not such unsafe aspects are an inherent characteristic of the product or are such that an ordinary person who uses the Bike with the ordinary knowledge common to the Class of persons for whom the product is intended is aware of such aspects.

For those residing in the state of Michigan, You must comply with Michigan Vehicle Code Chapter 257, which provides that:

a. You shall not tamper with or modify the Bike so as to change the manufactured motor-powered speed capability or motor engagement of the Bike without replacing the label required under subsection (2) with an appropriate label printed in Arial font and in at least 9-point type;

b. You shall not operate a Class 3 Bike if You are under 14 years of age; however, You may ride as a passenger;

c. You must wear a properly fitted and fastened bicycle helmet that meets federal standards established by the United States Consumer Product Safety Commission or the American Society for Testing and Materials
if You are under 18 years of age;

d. You shall not operate the Bike on a trail that is designated as nonmotorized and that has a natural surface tread that is made by clearing and grading the native soil with no added surfacing materials;

e. You shall only operate a Class 2 or Class 3 electric bicycle on a linear trail that has an asphalt, crushed limestone, or similar surface, or a rail trail if authorized by the local authority or agency of this state having jurisdiction over the trail.

Moreover, pursuant to the Revised Judicature Act of 1961 – §600.2946 and applying to those residing in Michigan, Ariel Rider shall not be responsible for failure to warn of a material risk that is or should be obvious to a reasonably prudent Bike user or a material risk that is a matter of common knowledge to those in the same or similar position as the person upon whose injury a claim is premised on. Ariel Rider shall not be liable for injuries resulting from product defects that could have prevented harm through the use of practical and technically feasible alternative production practices. Ariel Rider shall not be liable in a product liability claim for harm caused by misuse, alteration, or change of the Bike, regardless of whether or not the misuse was reasonably foreseeable.

For those residing in the state of Florida, You must comply with CS/SB 1148(4), which provides that:

a. You shall not tamper with or modify the Bike so as to change the motor-powered speed capability or engagement of the Bike, unless the label indicating the Classification number required in subsection (3) of CS/SB 1148 is replaced after such modification.

For those residing in the state of Oregon, You must comply with ORS 814, which provides that:

a. You shall not operate the Bike on any portion of a roadway that is not a bicycle lane or bicycle path when a bicycle lane or bicycle path is adjacent to or near the roadway;
b. You shall not operate the Bike and carry more persons on the Bike than the number for which it is designed or safely equipped;

c. You shall not operate the Bike and carry a package, bundle or article which prevents You from keeping at least one hand upon the handlebar and having full control at all times;

d. You shall not operate the Bike if You are under 16 years of age;

e. You shall not operate the Bike on a highway or on premises open to the public without wearing protective headgear of the type approved by ORS 815.052 if You are under 16 years of age;

f. You shall not commit the offense of unsafe operation of the Bike on a sidewalk, which includes but is not limited to:

a. Operating the Bike so as to suddenly leave a curb or other place of safety and moving into the path of a vehicle that is so close as to constitute an immediate hazard;

b. Not giving an audible warning before overtaking and passing a pedestrian, and not yielding the right of way to all pedestrians on the sidewalk;

c. Operating the Bike in a careless manner that endangers or would be likely to endanger any person or property;

d. Operating the Bike on a sidewalk;

e. Operating the Bike at a speed greater than an ordinary walk when approaching or entering a crosswalk, approaching or crossing a driveway or crossing a curb cut or pedestrian ramp and a motor vehicle is approaching the crosswalk, driveway, curb cut or pedestrian ramp (note this does not require reduced speeds for the Bike at places on sidewalks or other pedestrian ways other than places where the path for pedestrians or bicycle traffic approaches or crosses that for motor vehicle traffic).

Moreover, pursuant to ORS 30.915 and applying to those residing in Oregon, Ariel Rider shall not be responsible for foreseeable and unforeseeable modifications, alterations, and/or changes to the Bike,
regardless of whether or not Ariel Rider provided warning associated with modifications, alterations, or changes to the Bike.

For those residing in the state of Massachusetts, You must comply with Massachusetts Code, Ch. 85, Sec. 11B, which provides that:

a. You shall not ride a Class 3 Bike on a bike path or shared-use path unless permitted by the municipality, local authority or state agency having jurisdiction over that path;

b. You shall not tamper with or modify the Bike so as to change the motor-powered speed capability or engagement of the Bike, unless You appropriately replace the label required by subsection (3) of Massachusetts Code, Ch. 85., Sec 11B;

c. You shall not operate a Class 3 Bike if You are under 16 years of age; however, You may ride as a passenger;

d. You must wear a properly fitted and fastened bicycle helmet that meets the standards provided by either the United States Consumer Product Safety Commission or the American Society for Testing and Materials, or standards subsequently established by those entities, if You are operating or riding a Class 3 Bike, regardless of Your age and whether or not You are an operator or passenger;

e. You must ensure that the municipality or local authority having jurisdiction over the streets, roads, or ways You are operating a Class 3 Bike on allow the operation of Class 3 Bikes on those streets, roads, or ways.

Notwithstanding, even if You reside in a state that does not explicitly make any of the following activities illegal, You represent and warrant that:

a. You shall not tamper with or modify the Bike so as to change the motor-powered speed capability or engagement of the Bike;
b. You shall wear a properly fitted and fastened bicycle helmet that meets the standards provided by either the United States Consumer Product Safety Commission or the American Society for Testing and Materials, or standards subsequently established by those entities, regardless of Your age and whether or not You are an operator or passenger;

c. You shall not operate the Bike in a careless manner that endangers or would be likely to endanger any person or property;

d. You shall not operate the Bike and carry a package, bundle or article which prevents You from keeping at least one hand upon the handlebar and having full control at all times;

e. You shall not operate the Bike and carry more persons on the Bike than the number for which it is designed or safely equipped;

f. You shall keep at least one hand on the handlebars at all time;

g. You shall not operate the Bike on fully controlled limited access highways;

h. You shall not operate the Bike where motorized vehicles are prohibited.

Moreover, You represent and warrant that You must not operate the Bike with recklessness, carelessness, or disregard for the safety of Yourself or others, including but not limited to wheelies, burnouts, stoppies, rolling stoppies, donuts, hand drags, duanes, cartoon stoppies, tail drags, heel clicks, knee draggins, stand ups, left leg crossovers, stand up wheelies, sit down wheelies, rear peg wheelies, fender grabs, sidesaddle wheelies, high chair wheelies, flamingos, rolling burnouts, crossup burnouts, switchbacks, arches, tank headstands, rolling endos, droppies, christs, reverse christs, leap of faiths, leap of deaths, and any other stunt or activity, known now or in the future, that puts You at risk for injury.
LIMITED WARRANTY

Every bike by Ariel Rider E-bikes is covered under a manufacturer's one-year all-inclusive warranty for the original owner against all manufacturing defects. Warranty details below are subject to change at any time; for the most current warranty version, visit https://arielrider.com/pages/warranty. Ariel Rider E-bikes warrants this product, including all individual components against defects in material or workmanship as follows:

Ariel Rider E-bikes’ bike components including frame, forks, stem, handlebar, headset, seat post, seat saddle, brakes, lights, bottom bracket, crank set, pedals, rims, wheel hub, freewheel, cassette, derailleur, shifter, motor, throttle, controller, wiring harness, LCD display, kickstand, reflectors, and hardware are warranted to be free from manufacturing defects in materials and/or workmanship for a 1-year period from the date of original purchase.

Ariel Rider E-bikes’ lithium-ion batteries are warranted to be free from manufacturing defects in materials and/or workmanship for a 1-year period from the date of original purchase. The battery warranty does not include damage from power surges, use of improper charger, improper maintenance or other such misuse, disassembly, normal wear, or water damage.
WARRANTY EXCLUSIONS

• Liability for material defects does not cover normal wear and tear, which occurs from the manufacturers’ intended use of the product. Components such as the battery pack, motor system, braking system, drivetrain system, seat, grips and pedals are all subject to intended use-related wear and are not covered under the warranty from normal wear.

• Damage arising from the use of the bike in a competition or other applications outside of normal intended use.

• Damage arising from improper tools, improper assembly, or improper maintenance performed on the bike.

• Damage resulting from adding non-standard equipment, parts, or modifications.
ADDITIONAL WARRANTY TERMS

This warranty does not cover any damage or defects resulting from failure to follow instructions in the owner’s manual, acts of God, accident, misuse, neglect, abuse, commercial use, alterations, modification, improper assembly, wear and tear, installation of parts or accessories not originally intended or compatible with the bike as sold, operator error, water damage, extreme riding, stunt riding, or improper follow-up maintenance. This warranty does not include normal wear and tear, or consumable parts designed to wear down over time, including tires, tubes, brake pads, cables and housing, spokes, and handlebar grips.

Ariel Rider E-bikes will not be liable and/or responsible for any damage, failure, or loss caused by any unauthorized service or use of unauthorized parts. In no event shall Ariel Rider E-bikes be responsible for any direct, indirect, or consequential damages, including without limitation, damages for personal injury, property damage, or economic losses, whether based on contract, warranty, negligence, or product liability in connection with their products. All claims to this warranty must be made through Ariel Rider E-bikes. Proof of purchase is required with any warranty request.
INFORMATION ON COMPONENT WEAR

Components of the Kepler are subject to higher wear when compared to bikes without power assistance. This is because the Kepler can travel at higher average speeds than regular cycles and has a greater weight. Higher wear is not a defect in the product and is not subject to warranty. Typical components affected are the tires, brake pads and rotors, suspension forks, spokes, wheels, and the battery pack.

When the useful life of a component is surpassed, it can cause unexpected loss of function. This can result in serious injuries or even death. Therefore, pay attention to wear characteristics such as cracks, scratches, or changes in the color or operation of components which could indicate useful life has been exceeded. Worn components should be replaced immediately. If you are unfamiliar with regular maintenance, a certified, reputable bike mechanic should be consulted. Ariel Rider shall not be responsible for any and all damages or injuries resulting from the use of an Ariel Rider E-bike past its useful life.
