1. Your survival food is designed to last either 5, 10, or 25 years on the shelf (shelf life depends on the product). Storage conditions impact the shelf life of your food. For best results, always protect your food from heat, air, and moisture. Avoid prolonged exposure to temps above 75°F. Keep food sealed until ready to eat.
2. These kits are designed to provide energy and nutrients for one person in stressful emergency situations. They are not intended to be complete caloric replacements during “normal” times. You’ll want to make sure you have additional food items on hand so that in an extended emergency you’ll be able to supplement your daily caloric intake, nutrients, and variety with additional food items available in this catalog, food you have stockpiled in your pantry, fresh produce from your garden, etc. An average adult needs approximately 2,000 calories per day to meet their energy needs. These kits provide approximately 1,253-1,505 calories per day for one person. **This may not be enough for optimal nutrition, especially for an extended period of time, or if you are pregnant, a child, elderly, or have other health conditions.** In order to supplement your daily caloric intake, to add variety, or to provide food for more than one person, we offer a number of supplemental products, including food bars, meat packs, fruit and vegetable packs, etc. By combining our kits with these additional products, you can ensure that you have 2,000 calories per day available to you during emergency situations. We’d be happy to discuss your particular preparedness goals, and to help you select more or less survival food to meet your unique needs. Call 1-800-992-3134 to speak with our friendly Customer Service team.
3. All testimonials in this advertisement are from real people; sometimes names and photos have been changed to protect their privacy and some were given free products in exchange for their honest feedback. Testimonials represent exceptional results, don’t apply to the average purchaser, and are not intended to guarantee that anyone will achieve the same results. They have not endorsed, sponsored, or recommended this product; no affiliation or endorsement is claimed. Terms & conditions apply.
4. Reduction-rate testing verified by an independent laboratory; 150 gallons of water were tested. Results will vary based on the specific contaminant, water quality & source, and other factors such as product conditions. Do not use this product with unsafe water sources or with water of unknown quality. For removal rates, visit our website to see test results.
5. Your Patriot Pure Ultimate Water Filtration System targets 140+ contaminants when used as directed. Reduction-rate testing verified by an ANSI-certified independent laboratory to NSF standards; 400 gallons of water were tested. Results will vary based on the specific contaminant, water quality & source, and other factors such as product conditions. Do not use this product with unsafe water sources or with water of unknown quality. Regular filter replacement is recommended. When you notice a significant change in flow rate, taste or smell, it’s time to change your filter.
6. Reduction-rate testing verified by a TUV SÜD-certified independent laboratory. Results will vary based on the specific contaminant, air quality & source, and other factors such as product conditions. Regular filter replacement is recommended.
7. Refrigerators, freezers, and similar appliances maintain a safe temperature by running on cycles. The CDC recommendation is to keep temperature below 40°F and above 32°F. If starting with a cold appliance, running backup power to your fridge for 1 hour will maintain temperature for about 4 hours. Usage conditions will impact this estimate (interior temp, exterior temp, appliance age & features, fridge contents, etc.).

3. Real reviews from real customers. Sometimes customers receive a free product to test or receive a free product as a thank you for submitting honest feedback. For more information, see page 2, footnote 3.

PATRIOT VITAL4: KEY TO YOUR VIBRANT HEALTH

Nutrient deficiencies could be robbing you of health and vitality... and you might not even know it. And the health of many Americans is suffering as a result.

For example, as many as 95% of Americans are deficient in Vitamin D. We don't get it from food, regardless of how carefully we eat. We need to make it from sunlight exposure, and we're not outside enough to do the job.

But there's another reason we're coming up short of the Vitamin D we need. Unless you have sufficient magnesium to “activate” the Vitamin D you're taking... it doesn't work like it should. And as many as 8 out of 10 older Americans are deficient in magnesium too!

Patriot Vital4 is a targeted nutritional foundation to give you the exact, critical nutrients you're likely missing. With both Vitamin D and magnesium, but also sufficient levels of CoQ10 – an absolutely essential nutrient for heart health. And choline – a brain and memory booster that 92% of Americans are missing right now.

When you consider what these “vital 4” nutrients can do for your body, you're likely getting far less than what you need.

Portable Power Protection Against Blackouts

THE PORTABLE SOLAR GENERATOR THAT’S FOUND IN THOUSANDS OF HOMES ACROSS AMERICA

Every year, tens of millions of homes in North America lose power for hours, days, or even weeks. And sadly, too many of us aren't adequately prepared.

We've become so dependent on our electrical supply, that when it suddenly fails, we're lost.

We forget how to function until the lights magically come back on. In a nation that can't go a few minutes without checking their cell phones, a week without power is a nightmare most can't imagine.

But each day, our aging grid becomes more vulnerable to weather, natural disasters, and even a targeted attack.

Blackouts aren't an "inconvenience" anymore. Everything STOPS. Massive blackouts aren't just a nuisance. Appliances become useless. No computer, no way to charge a phone. Food spoils. Traffic lights go down. Medical devices stop working.

ATMs give you a blank stare. Those who haven't prepared could sit helpless in the dark and cold. Or if it happens in the summer... they swelter instead. And children and seniors would suffer the worst. Fortunately, there's an answer – the Patriot Power Generator 1800!

You're Probably Wondering, "What Does It Power?"

If an appliance uses 1,800 watts of power or less, the Patriot Power Generator can run it. Most small appliances including your fridge and freezer fall into this group. Question really is... how long will it run each device?

Approximate Run Times for Common Appliances (results vary):⁷

- 120W Fridge: Up to 13 Hours
- 6W iPhone Charger: 128 Hours
- 50W CPAP Machine: 13.8 Hours
- 2W USB Lamp: 384 Hours
- 800W Microwave: 49 Minutes

Safe to use indoors!

With Backup Power, Choose Wisely

This is reality. But if best intentions lead to a gas-powered solution, you're playing a dangerous game. Storing fuel at home is very dicey.

Gas stations could sell out or can't pump. And fumes can be deadly.

Your power source must be lightweight, fume-free, and whisper quiet. And you need to be able to recharge again and again... for FREE.

The Solution:

The Patriot Power Generator 1800

You need the advanced protection of this improved portable solar generator. Compact, to go anywhere with you. Charges fast, with free electricity from the sun. And silent and fume-free, to use it inside.

The Patriot Power Generator 1800 is only 10.5" tall and weighs just 40 pounds. Fume-free and never needs gas... ever!

My Kids Were SO Grateful for These Solar Chargers in the Storm!

“I bought 4 of the Patriot Power Cells at Christmas time. And the kids were like, 'Oh, thanks, mom... yeah.' And then, you know what? We lost power. We had nothing.

And do you know what kids do when they don't have their cell phone? Well, these Power Cells worked better than their charger when they did have power. They were SO grateful. It was a blessing!”³

This portable, rechargeable, and powerful blender is the perfect way to make smoothies, shakes, and more – at home or on-the-go. Single push-button operation and stainless steel blades let you blend the perfect drink fast, then tuck it away without cluttering up your counter.

Rechargeable and cordless, it slips right in your bag or purse for a delicious smoothie at work, at the gym, at the campsite, or tailgate... even in the car!

Fits in your hand, and the included travel base lets you blend and go in seconds – the “to go” cup easily fits in your cupholder.

Safe to use, easy to clean, and a snap to recharge anywhere you have access to power – from an outlet, your laptop, your car, or even a portable cell phone charger.

Regular blenders are hard to use, clean, and store. And forget about traveling with one...

Not the Patriot Power Blender. At home, it’s the perfect, tuck-out-of-sight blender, compact, and always ready.

And at only 1 lb. and 10 inches tall, it’s your to-go companion for a blended drink anywhere your travels take you!

You’ll find new uses for your Patriot Power Blender every day. A quick chop or dice of veggies. A blended hummus or salsa. Even make-your-own baby food or grind seeds or coffee beans.

But the best part: you can enjoy a power smoothie in the morning, when time is tight and nutrition is so important. Just fill it up and blend on the go!
