HOW TO DETERMINE YOUR RING SIZE

Ring sizing can be hard to do at home. My first option to get an accurate ring measurement is to go to a local jeweler and have your ring sized by an expert. If that's not possible, I created this pdf to help you navigate ring sizing.

Please keep in mind that rings that have gemstones all around it or rings with a carved design or pattern all around (like the romanesque bands) are not resizable.

***BEFORE MEASURING - CONFIRM PRINTED PAPER SIZE ***

1. Ring measurements are very precise. Carefully follow these instructions to obtain an accurate measurement.
2. Prior to printing, ensure that *Page Scaling* is set to "None" on your print dialog box.
3. Measure the bar on the left. It must be exactly 1 inch or 30 mm long. Alternately, place a quarter where indicated. The quarter should fit completely over the image so that all lines are covered, without the quarter hanging over any edges.

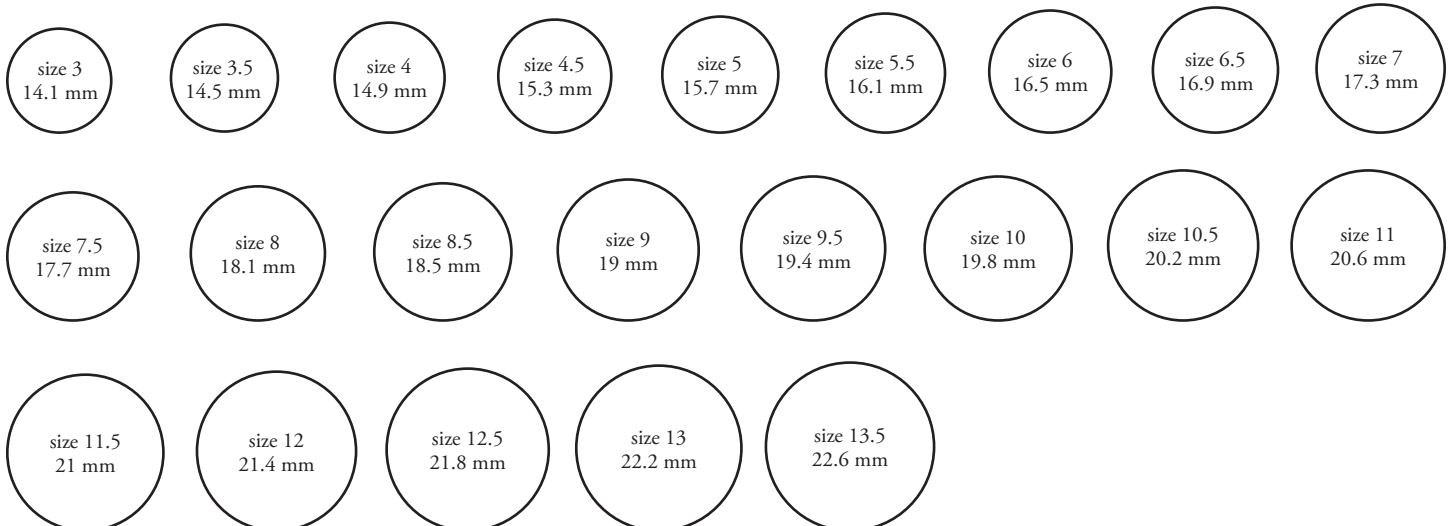

MEASURE AN EXISTING RING

1. Select a ring that properly fits the intended finger. (Engagement and wedding rings are traditionally worn on the ring finger on the left hand in the United States.)
2. Place the ring over the circles below, matching the inside edge of the ring to the circle nearest in size. This measurement refers to the inside diameter of the ring.
3. If the ring falls between two sizes, order the larger size.

Measurements match the **inside** edge of the ring.

US & CANADIAN RING SIZES:

Remember: we cannot guarantee that paper ring measurements are accurate. Please email us or go to a local jeweler to have your finger sized.
