

SALES CATALOGUE 2022 | 2023

Secure contactless payments

Make secure wearable payments with Invis watch strap. Pay just like you would do with your card using the same PIN code. Manage security level according to your needs.

Closed buckle detection

The system recognizes when the strap is fastened and when it is unfastened. Payment is only possible when the watch strap is fastened.

Strong authorisation

You can mark a safe Wi-Fi zone; the system will automatically recognize it and unlock the payment service. Outside the secure zone, the system will ask for a PIN during startup.

Activation by Gesture

You can block the payment during the day and trigger it with a double tap before the transaction. After the transaction, the system will block the payment again..

When using the Invis Pay Guard watch strap, you pay in the same way as you pay with your card. The same rules and restrictions apply, and you use the same PIN. It is possible thanks to PROVISIONING - it can be carried out in several ways:

Online store

The payment card is securely tokenized online by Visa or Mastercard services when purchasing the watch strap at our webstore. After receiving the parcel, you activate the payment in the app.

Traditional store

You can tokenize your card at the store where you buy the INVIS watch strap, as long as your retailer offers this option. Ask about it in the store and follow the instructions of the store employee.

Application

You can also go through the provisioning process in the application (iOS and Android). With just a few clicks, you can pay. If necessary, you can also change the card in the app.

Invis Pay Guard is certified by Visa and Mastercard. Thanks to over 100 cooperating banks and the Curve card, we are available in 30 EEA countries as well as in the UK and Switzerland.

Our watch straps are handmade in Germany using genuine leather by our partners at RIOS1931. Watch straps are hand stitched with exceptional precision and combined with NFC chip. The finished product is a traditional work of art with modern features.

Art Manuel

172 production steps. The high-end »Art Manuel« strap is hand finished similarly, to a »Goodyear welted« or »frame-stitched« shoe. The finest of traditional craftsmanship.

Saddler's Seam

It takes a master craftsman about 40 minutes to complete a perfectly stitched saddler's seam (hand seam) that will last and last.

Water resistant

Water resistance achieved by high-tech materials or a hydro-finished upper leather, intermediate layer and leather lining.

Organically Tanned Leather

Upper and lining leather is tanned with vegetable substances processed according to traditional formulas with extracts of groundwood, bark, leaves and fruits.

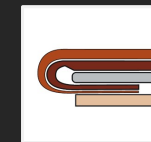

Organic Watch Straps

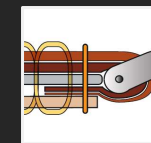

Chromium-free . Natural & vegetable-tanned leather. Allergy-friendly. Animal welfare approved | Sustainability chain. Leather from German cattle from approved organic farms »Biokreis«.

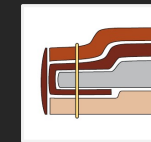

Full-bugg strap
Production method for RIOS1931

The edges of the upper leather are glued under the lining leather.

The stitching goes through all layers.

The upper leather is stitched tightly under the leather lining.
