6 Queens Rd, Melbourne VIC 3004

Times: 9am – 5pm

CPD: see website for details

Price: \$2,134 inc. GST

Early Bird Price

See website for details

PROFESSOR MING QING ZHU

Born in Shanghai China in 1940, Prof. Zhu graduated in the first class of Acupuncture from the Shanghai University of Chinese Medicine in 1964. For over 50 years Prof. Zhu has been continually treating patients and lecturing all over the world.

Prof. Zhu was recognised very early as a seasoned doctor because of the quality of the results he achieved.

His reputation has grown dramatically since the demonstration of his innovative Acupuncture technique on a hemiplegic stroke patient at the 1st international conference of Acupuncture and Moxibustion in Beijing 1987, where the patient was able to stand and ambulate without support.

As a result of his success he has received many formal accolades and international acclaim. In his tireless career he has also served as director or assistant director in many associations, hospitals, institutes and colleges.

FINAL OPPORTUNITY TO LEARN FROM PROFESSOR ZHU

This series will be the only opportunity to learn directly from the founder of Zhu Scalp Acupuncture Professor Zhu himself as he will not be teaching further seminars in Australia after these courses.

DR JAMES LU

Dr Lu is a direct disciple of Dr Zhu and the director of Zhu's Neuro Acupuncture & Rehabilitation Centre.

Dr Lu, a licensed Acupuncturist and Physical Therapist, has been in the medical profession for over 20 years.

He has worked as Director of Rehabilitation and Senior Physical Therapist in a variety of settings, including hospitals, rehabilitation centers and private clinics.

In 2011, Dr Lu began following Professor Ming Qing Zhu's work, and completed two years of courses in Zhu's Scalp Acupuncture training.

In the same year, he pioneered the first outpatient acupuncture program at the Hospital Corporation of America (HCA), a company that includes 162 hospitals and 113 free-standing surgery centers in England and 20 U.S. states.

Shortly thereafter, this acupuncture program was extended to the pre- and post-operative ICU/in-patient care for patients undergoing cardiac and thoracic surgeries.

I have been applying scalp acupuncture for almost 2 years in my clinic and achieved a lot of amazing results, not only for neurological conditions but also for pain and all other internal medicine. My weekly appointment volume has also increased 50% since applying Zhu's Scalp Acupuncture.

DR SCOTT LING

Chief Acupuncturist @ Sustain Health

ZHU'S SCALP ACUPUNCTURE

Based on his 50 years of clinical experience and developed by Professor Zhu.

Zhu Scalp Acupuncture is one of four Scalp Acupuncture systems known in China. It is recognised as one of the most effective Acupuncture systems for treating difficult conditions.

ZSA uses a microsystem on the scalp to affect different systems and areas within the body. It is an integrated system between Chinese and Western medicines and has its own map of treatment zones on the scalp.

Professor Zhu's technique involves very short, fine needles to avoid any undue discomfort for the patient.

The needle insertion is combined with appropriate stimulation techniques and specific physical movement/exercise, known as Dao Yin, to greatly increase the efficacy of the Acupuncture.

HOW IS ZHU SCALP ACUPUNCTURE DIFFERENT FROM OTHER ACUPUNCTURE METHODS?

1. The patient can easily be treated in a seated position.
2. The application of needles is painless.
3. Patients display immediate positive responses that translate into long term positive outcomes.
4. Long needle retention times, even up to 3 days, provides the patient with a continual therapeutic action.
5. It is an integrative form of medicine, informed by both Western and Chinese Medicine paradigms.
6. The necessity for 'Daoyin' as part of the treatment in order to achieve superior clinical outcomes.
7. ZSA is easily integrated with other styles of Acupuncture without conflict.

**SUSTAINHEALTH
ACADEMY**

WHO SHOULD ATTEND THE NEUROLOGICAL & PAIN DISORDERS

1. Practitioners who have a special interest in effective treatment of all kinds of neurological conditions by using Zhu's Scalp Acupuncture
2. Practitioners who have a special interest in the effective treatment of neurological motor and sensory pain and nerve pain by using Zhu's Scalp Acupuncture
3. Practitioners who would like to learn why the "scalpacupuncture+daoyin" is the secret of effectiveness for neurological and pain conditions
4. Chinese medicine students and new graduates who like to specialise in neurological conditions and scalp acupuncture + Daoyin method in the early days of their careers

WHAT YOU WILL LEARN FROM THIS COURSE

- learn the differential diagnosis as well as the effective management of pain and sensory disorders
- explanation the analgesic effects of acupuncture and the history and operation of acupuncture anesthesia
- learn how to identify the causative factors of any movement disorder and how to restore motor functions to normal
