Palace Of Dreams

Palace Of Dreams - Pre Fall '22

A yearning to return to the root of inspiration and the birthplace of the collection, India in all its majesty began to manifest in Hannah's conscious thought. The richness of texture, pattern and color was carefully researched and explored from a distance through treasured journals, photographs and bits of old fabric.

As pattern and color began to radiate with the essence of sacred memory, the search for fabrications and textures to retell ancient stories became a journey in and of itself.

The palace of dreams is a mythical place of longing and return and the Hannah woman is encouraged to indulge in fantasy, to surrender to the richness of imagination and to allow vivid color and ethereal fabrics to lure her into a dreamscape of exquisite beauty.
