Pain pills are too dangerous. So we fixed it with intelligence.

**Low Level Laser Therapy (LLLT) is Well Researched**

Laser technology is well researched and documented and has been used for years. Much of the landmark research was done by the National Aeronautics and Space Administration (NASA), providing the springboard for many additional studies.

**Where Does Willow Curve Pain Therapy Fit?**

1. 660 nm to 925 nm

Willow Curve operates in a wave length range for therapeutic benefit. Wave length determines depth of tissue penetration. [https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5653719/](https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5653719/)

The Willow Curve Ai sensory software produces dynamic non-coherent micro-beams that are dynamically and intensely pulsed. The average irradiance produced on axis is 59.97 (W/m²). The average peak infrared wavelength on axis is 894.6 (nm). The Willow Curve automatically manages the temperature in a safe range below 116 degrees farhenheit.

The Willow Curve design covers a wider treatment area than a conventional laser beam. The dynamic pulsed micro-bursts and micro-photonic dosage produced penetrates from multiple physical angles to various depths. This requires less energy producing less thermal tissue effect.

*Willow Curve on charging dock*

Willow Curve is safe and can be user operated hands-free. There is no special training or safety gear required. Simply place it on the painful joint, press the power button and application mode button, and relax for 25-minutes. The Willow Curve does the work with its sensory therapeutic software. A gentle tone signals completion of your therapy session.

- **NEW CPT Insurance Reimbursement Code: 0552T (non-attended) Created and Assigned to the Willow Curve** by the American Medical Association for insurance reimbursement “low-level laser therapy, dynamic photonic and dynamic thermo kinetic energies, provided by a physician or other health care professional.”
- **Durable Medical Equipmenf Insurance Reimbursement Code E0221:** Assigned by Medicare
- **The Willow Curve is FDA registered and patented**
- **Recipient of the Arthritis Foundation Ease of Use Commendation**
