# INNER BEAUTY

Glowing skin, healthier hair and the promise of better brain health in the form of potions, pills and powders? Yes, please.

**BOOSTERS** Stamba Creamy Maca Matcha merges a superfood tea blend with mood-boosting ingredients; the CBD category expands this spring (and this time, with something made especially for women) with the introduction of Winged CBD and its Happiness Capsules; Sakara's new Hemp Chocolates satisfy sugar cravings and dish out a bit of relaxation in the process; in a foray into the limited-edition field, Dirty Lemon's latest elixir, +white rose, promises to support healthy skin and up hydration; and The Nue Co Nootro-Focus is backed by a bunch of science, psychostimulants and patented ingredients to amp mental clarity.

**REBOOT** The brand made a name for itself with its tools, and now ReFa is getting into the collagen drink game with the new Collagen Enrich; poised as a "before a big event" prep, Glotriton 10 Day Quick Glo delivers a speedy skin refresh; Bend Beauty's Anti-Aging formula features a high percentage of fish and borage oils, and even claims to help increase skin's resistance to UV rays; and achieving #hairgoals gets easier with Moon Juice Super Hair's bioactive-packed pill and Grow Girl Let It Grow gummies, which contain biotin and vitamin B12 and are scientifically proven to help improve hair growth in less than 30 days.

**DETOX + GLOW** Biocol Labs something for a detox week is the doctor-approved, very modern apothecary answer to supplementing or resetting a healthy diet; scoop or sprinkle The Gut Lab Glow powder into a smoothie, salad or dish for some extra superfood power; HUM Nutrition Skin Heroes Pre+Probiotic targets problematic skin, including acne; Bali Glow may look pretty, but the potent spirulina powder has a high dose of protein and calcium; and chef-created Just Add Water keeps things simple with an all-in-one powder that includes alkalizing greens, antioxidants and antifungal superfoods.
