ASIAN INTEGRATED MEDICAL SDN BHD  
(Company Reg. No. 1016900U)

**Watching television, reading or eating breakfast in bed with automatic comfort seating**

The automatic comfort seating brings the bed into a pre-selected seating position for watching TV and reading comfortably, for eating or communicating at the eye level. Mobilization using the lifter is effectively supported in this position.

In addition, this position facilitates breathing and digestion. It trains spatial orientation and simulates circulation for residents confined to bed. The double retraction provides additional relief of pressure in the sacral area.

**Bedsore prevention and keeping heels free with automatic positioning**

The preset legs up position promotes decongestion with venous diseases and at the same time supports pressure ulcer prevention.

The Semi-Fowler 30 position with knee lifting guarantees a reduced decubitus risk\* thanks to a favourable weight distribution in the sacral region, which is especially at risk of developing pressure ulcers.
