HOME HAZARD ASSESSMENT & MODIFICATION TRAINING

Introduction

Home hazard assessment is best to be undertaken in the person's home. However, home hazards assessments can be alternatively conducted using technology such as photography, video and teleconference applications such as Google Meet, Microsoft Team or Zoom. Home hazards management is the first step to ensure safety and prevent any injury or accidents such as falls, burns, choking and cuts.

Skills in conducting a simple assessment or screening on home hazards existence is crucial, in particular, the healthcare professionals mostly dealing with older people such as occupational therapists, general practitioners, nurses and public health officers. There is a need to ensure that the healthcare professionals are able to properly perform home hazard assessments for older people who are admitted to hospital after having a fall, and are able to offer basic safety advice appropriately.

Objectives

At the end of this workshop, the learners are expected to have competency in:

- Identifying the existence of hazards in the older client's home using the standardized tool.
- Perform the home hazards assessment using the Home Falls and Accidents Screening Tool via conventional or alternative methods.
- Home modification solutions on basic home hazards management based on the home hazard assessment outcomes.

Module 1 - Housekeeping & welcoming

About the Trainer

Dr. Kong Why Hong received his training as a Traditional Chinese Medicine (TCM) practitioner at Guangzhou University of TCM (China) in 1998. In 2010, he went on to pursue a medical doctorate degree at Crimea State Medical University (Ukraine).

He holds a Ph.D. in Traditional Chinese Medicine (TCM) with a specialization in oncology (cancer). His extensive TCM expertise was acquired through over 23 years of dedicated practice at his private TCM clinics in Malaysia.

Dr. Kong possesses a wealth of extensive medical practice expertise, encompassing both emergency care and rehabilitation, gained through his tenure at prominent government hospitals. Additionally, Dr. Kong served as a Senior Assistant Director in the Traditional and Complimentary Division within the esteemed Ministry of Health in Malaysia. In his pursuit of academic excellence, he also held a part-time lecturing position at Xiamen University Malaysia and INTI International University.

Dr. Kong's professional credentials include registration as a medical doctor with the Malaysia Medical Council (MMC). He also fulfills the role of General Secretary in the esteemed Malaysia Chinese Medical Association (MCMA), alongside holding lifelong memberships in the Malaysia Medical Association (MMA), Acupuncture Association of Malaysia (MAAM), and Malaysia Oncology Society (MOS).

Previously, Dr. Kong served as the Head of Clinical at GHHS MINES wellness city, where he demonstrated his exceptional leadership and clinical acumen. He is currently practicing as a medical doctor in Poliklinik Perdana in Cheras Perdana and practicing acupuncture therapy in AIM Healthcare Acupuncture TCM center. Dr. Kong is also the founder of iElder.asia, a medical equipment supply company centered on geriatric and home care.

About the Trainer

Olivia Quah Hooi Pin is a highly accomplished individual with a diverse background. She holds a bachelor's degree in computational mathematics from the University of Malaya (UM), which demonstrates her strong analytical and problem-solving skills.

In addition to her academic achievements, Olivia is a certified trainer by the Human Resource Development Corporation (HRDF), indicating her expertise in training and development.

Recognizing the growing need for elderly care, Olivia ventured into running an elderly care center as a family business. Through this endeavor, she has gained extensive knowledge and experience in the elderly care industry for more than 10 years. Her involvement in various senior-related associations has allowed her to network with professionals in the field and stay informed about the latest trends and advancements in elderly care. Furthermore, Olivia has diversified her business interests by engaging in medical product distribution. This involvement has deepened her understanding of the healthcare industry, specifically in relation to products and services catering to the needs of seniors.
