We're re-defining antiques and making them like no-one else!

Indelible Leather Finishes did something incredible! How many leatherworkers have wondered why antique finishes only came in shades of brown? Enjoy colors that boldly stand out and have more creative choices at your fingertips.

Resist and Finish

A waterbased topcoat used as a resist before applying our Indelible coloured Antiques to Leather.

Resist & Finish also works well as a final coat sealant to protect smooth leathers from moisture and dirt.

How to use

First apply a minimum of 2 coats of H2Overcoat Resist & Finish Gloss or Matte approximately 15 minutes apart with a damp sponge or fine brush (Makeup Compact

Powder Brushes work really well) and then let it dry and cure for at least 12 hours.

Best results are obtained if the Resist procedure is repeated at least 2- 3 times before applying H2Overcoat Antiques.

Apply the antique with a piece of sheepskin, sponge, dauber or brush, use liberally to ensure it gets into all the tooling and background indentations/cuts. Wipe away excess with dampened paper towel or soft cloths (replace paper towel/cloth frequently). Do not rub hard (a light touch is important to make sure the antique stays in the dents).

Wet cotton buds are very useful to remove antique from small areas.

Colored Edge Inks

The Indelible line of Edge Ink is the best we've ever seen. Amazing colors, flexible finish, doesn't chip, crack, or peel. This stuff applies so evenly and dries quickly so that you don't have to wait forever to finish your edges!

How to use

Shake well and let bubbles settle. Sand and bevel your edges to your liking, then apply a coat of Indelible Edge Ink (can be applied with an edge paint roller or dauber). After about an hour the paint is dry and you should sand it lightly with a fine sand paper until it is smooth (I use 320 grit). Apply a 2nd coat of Indelible Edge Ink and in an hour decide if you need to sand, smooth and re-apply a 3rd coat. Most of the times 2 coats will do the trick!
