Cal. 706.1

Pos. I Position of rest (watch running)

Pos. II *During the blocking period from 10.00 pm–5.00 am, automatic changes are in progress. It is not allowed to activate the pushers A or B or C (quick-correction of date, day of the week, month) during the blocking period. Pressing the pushers during this period may cause malfunctions in the movement.*

Setting sequence for: moonphase display, day of the week, day and time (e.g. after a battery change)

1. Pull crown out to position II (watch is stopped).
2. Set the moonphase display:
 - Turn the hands forward by turning the crown, until the full moonphase position appears.
3. Set the day of the week and date:
 - Turn the crown until the time of 06.00 am appears (= beyond the blocked time period).
 - Using the quick-change correction, set the date with pusher A, and the day of the week of the last full moon with pusher B (see table). Then using the crown, move the hands forwards until the current date appears.

Cal. 706.1

4. Set the time:
 - Turn the crown until the current time is displayed (remember the 24-hour cycle).
5. Push crown back into position I.

Quick-change correction for date:

Press pusher A, until the current date is displayed (remember the blocking period).

Quick-change correction for the day of the week:

Press pusher B, until the current day of the week is displayed (remember the blocking period).

Quick-change correction for the month: (cal. 706.3)

Press pusher C, until the current month is displayed (remember the blocking period).
