## LA CHAUX-DE-FONDS

Gegenheim Instruction Manual

[www.gevril.com](http://www.gevril.com)

## Winding

This is an automatic winding mechanical watch, using a mainspring as power source. Pull the crown to position A. Turn it clockwise 30-40 times in position A. Once the mainspring is wound fully, the watch will run for 40 hours.

When wearing the watch, with enough movement it winds the mainspring automatically.

## Setting Time and Date

Pull the crown to Position B to set the Date

Pull the crown to Position C to set the Time

**Keep crown pushed in to ensure water resistance.**

**Do not change the time between 9.00 PM - 1.00 AM.**
