Push to set Month

The crown provides three options for hand winding the movement, setting the date and adjusting the time. The push button is used to set the month.

#### **A - Winding the mainspring**

The watch can be manually wound by winding the crown clockwise while in the “A” position. Wind your watch 15-20 times until the second hand starts to sweep naturally.

#### **B - Adjusting the day and date**

Adjust the day - by winding the crown counter-clockwise while in the “B” position.

Adjust the date - by winding the crown clockwise while in the “B” position.

#### **C - Adjusting the time**

While in the “C” position the crown can be wound clockwise or anti-clockwise to adjust the time.
