

Gevril's Madison Collection proves straightforward and sophisticated always wins. Like Madison Avenue itself, luxury prevails in the sleek 39mm round Stainless Steel Case with an Exhibition Back. Automatic SW220 movement below anti-reflective Sapphire crystal.

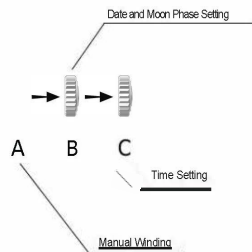

Whether on Italian leather or Stainless Steel bracelet with deployment buckle, the Madison man is bold, authoritative and decisive.

LA CHAUX-DE-FONDS

Madison Date -Moon Phase
Instruction Manual

Winding

In order to wind it first unscrew the crown by turning it counterclockwise until it is released.

This is an automatic winding mechanical watch, using a mainspring as power source. Unscrew the crown to position A Turn it clockwise 30-40 times in position A. Once the mainspring is wound fully, the watch will run for 40 hours.

When wearing the watch, with enough movement it winds the mainspring automatically.

Setting Time and Date

Pull the crown to Position B to set the Date and Moon Phase Setting

Date and moon phase (at 6 o' dock) with quick setting
Day/Night Indicator by Disc at 10 o'clock

Pull the crown to Position C to set the Time

Keep crown screwed in to ensure water resistance.
Do not change the time between 9.00 PM - 1.00 AM.
