# Universal Portrait Projector Mount

FOR PROJECTORS UP TO 125LB (56.7KG)

Peerless-AV's Universal Portrait Projector Mount is the perfect mounting solution for holding a projector in multiple orientations. Whether the projector is needed in portrait orientation for digital signage, or positioned toward the floor in an interactive exhibit in a museum, the PJR125-POR-EUK provides mounting flexibility. The tilt, roll and swivel features are all lockable to prevent even the smallest shift of the image. Six universal legs provide additional support for projectors with more than four mounting holes and are completely adjustable. The Hook-and-Hang™ feature provides a large landing area when securing a projector to the mount and takes the weight off the installer while they are making adjustments.

- Pre-assembled design reduces installation time
- Includes six universal mounting legs (four preinstalled)
- Universal adaptor plate extends up to a 25.5" (648mm) mounting pattern to accommodate most projector models
- Cable management allows cables to be routed through the mount and out of sight
- Simple Hook-and-Hang™ design eases the installation of heavy projectors
- PJR125-POR-EUK works with Peerless-AV® ADD%, AEC%, EXT%, MOD% extension columns
