

Peerless AV® Presents Digital Signage Innovations at DSSE 2019 in Munich

Highlights include weatherproof display, LED mounting system, indoor and outdoor kiosk solutions and an electric vehicle charging station

Watford, UK, 5 June 2019 – AV technology pioneer Peerless-AV® today announced its return to the Digital Signage Summit Europe (DSSE), taking place at the Hilton Munich Airport Germany, 3-4 July 2019. Exhibiting on stand S-9, Peerless-AV will be showing a 55" Xtreme™ High Bright Outdoor Display water tank demo alongside an LED wall mounting system, Indoor Portrait Kiosk with camera and speakers, Smart City Outdoor Kiosk and an electric vehicle charging station.

Visitors will witness the weatherproof capabilities of the Xtreme High Bright Outdoor Display as it is sprayed with water to simulate its resistance to harsh environmental conditions. An ideal digital signage and wayfinding solution, the Xtreme display is truly sunlight readable, offering 2500 nits of brightness and outstanding video playback quality. Fully sealed, without the need for exhaust vents or additional HVAC equipment, the Xtreme operates from -35°C to 60°C, is IP68 rated against the ingress of moisture and dust, and features IK10 rated impact resistant safety glass.

The new Smart City Outdoor Kiosk, featuring back-to-back Xtreme High Bright Outdoor Displays for maximum impact and interaction, will also be on the stand. A modern and practical digital signage solution, the Kiosk is designed for 24/7 unattended operation and can withstand winds up to 140mph. Alongside, there will be a modern and stylish EV Charging Kiosk with back-to-back Xtreme Outdoor displays demonstrating the potential for revenue generating advertising in high traffic retail and transport locations.

For indoor information, advertising and wayfinding applications, Peerless-AV will show a Universal Indoor Floor Standing Portrait Kiosk for a 65" display with HD web camera and 35W speakers with amplifier.

Furthermore, a quick and easy to install, dedicated mounting solution for Direct View LED (DvLED) will be on display, featuring height and depth adjustment, predetermined adaptor rail locations, wall plate spacers and a modular, lightweight design.
