

Peerless-AV® Shows IP68-rated Outdoor All-weather Solution at Integrated Systems Russia 2019

See the Xtreme™ High Bright Outdoor Display with Video Wall Mount range on the Digis Group booth #DS-11

Watford, UK, 16 October 2019 – AV technology pioneer Peerless-AV® today announced its presence at Integrated Systems Russia 2019, 23-25 October, Moscow Expocentre. On the Digis Group stand #DS-11, Peerless-AV will be supporting a Philips video wall with a range of video wall mounts and visitors will see the award-winning Xtreme™ High Bright Outdoor Display at the reception desk. An SR560M Mobile Trolley with Rotational Interface for the 55" Samsung FLIP (WM55H, WM55R) will also be shown on the Jet Infosystems stand (#S-11).

“We look forward to returning to Integrated Systems Russia,” said Melinda Von Horvath, Vice President of Sales & Marketing - EMEA, Peerless-AV. “The business is seeing a wide variety of requests from customers in Russia, from innovative, custom solutions for challenging and complex installations to smaller orders of standard products for more budget conscious projects. There is still a lot of appreciation for US-made quality products. ISR gives us the opportunity to ensure these products are demonstrated successfully to the market.”

On stand DS-11, a 2x2 video wall using 55" Philips displays will be installed on the following Peerless-AV mounts: DS-VW765-LAND, DS-VW765-LQR, DS-VW775-QR and DS-VW775+ACC-QRL. The mounts are packed with innovative features that offer up to a 60% reduction in installation time. These include tool-less micro adjustments at 8 points and custom made screen specific spacers which eliminate on-site measuring to ensure perfect display alignment every time. All offer convenient, quick access to the rear of the displays for servicing and maintenance.

An XHB552 Xtreme™ High Bright Outdoor Display, featuring the widest operating temperature range (-35°C to 60°C,) and the highest environmental rating in its class (IP68), will be used to greet visitors to the stand. An ideal outdoor digital signage and wayfinding solution, the Xtreme display is truly sunlight readable, offering 2500 nits of brightness and outstanding video

playback quality. Fully sealed, without the need for exhaust vents or additional HVAC equipment, the Xtreme fully protects against the ingress of moisture and dust, and features IK10 rated impact resistant safety glass.

Additionally, an SR560-FLIP Mobile Trolley with Rotational Interface will also be shown on the Jet Infosystems stand (#S-11) together with the new 55" Samsung FLIP 2 (WM55R). Mobility, appealing design, display height adjustment and a pre-assembled base ensure quick assembly, while providing a rigid, but attractive structure. The 4" casters make it easy to move from room to room. The rotational interface allows easy rotation of the display 90° from landscape to portrait, and holds the display at a negative 4.5° to further promote ergonomics with a more natural angled writing surface.
