

ISE 2018 PREVIEW - #12, F90

Peerless-AV® Launches New Ultra-Slim Portrait Kiosk at ISE 2018

Watford, UK, 23 January 2018 – AV technology pioneer Peerless-AV® today announced the introduction of its newest kiosk, the Ultra-Slim Portrait Kiosk (KIPC35) for the latest 40"-65" LED displays and interactive touch screen panels up to 88mm (3.5") deep. Visitors to ISE 2018 will see the new kiosk in action for the first time in Hall 12, Stand F90.

Featuring a sleek and stylish pre-assembled design with lean frames and a small footprint, Peerless-AV's Ultra-Slim Portrait Kiosk serves as an attractive digital signage solution for any indoor application, including corporate, education, transportation, retail, and more.

"Like the rest of our Kiosk line, the new KIPC35 Kiosks are manufactured in the UK for faster delivery and shortened lead times, and are available from January 2018," said Keith Dutch, Managing Director - EMEA, Peerless-AV. "These ultra-slim kiosks allow us to minimise the design and build time for integrators, while still offering a completely custom solution."

In addition to a slimmer design, the new Ultra-Slim Portrait Kiosks offer a robust set of features. Its pre-assembled design reduces installation time and 8-point tool-less adjustment allows quick positioning of a display within the kiosk window for a flush alignment. Hinged rear doors with combination locks provide enhanced security and allow convenient access to just the parts requiring maintenance. A wide range of standard customisation options are available, including multiple colours and vinyl wraps to meet the needs of any environment or brand.

The new KIPC35 Ultra-Slim Portrait Kiosks are available through Peerless-AV's authorised reseller and distribution network. For more product details, visit <https://www.peerless-av.com/en-uk/professional/products/KIPC35-EUK>
