

Peerless-AV® Introduces New LED Video Wall Configurator

The new online tool streamlines the design of LED Video Walls for integrators

Watford, UK, 26 July 2018 – AV technology pioneer Peerless-AV® today announced its newest online solution for integrators, the [LED Video Wall Configurator](#). Users are being given a tool that streamlines the design of LED video walls, where they can obtain specifications, quotes and support, with the simple click of a button.

“Peerless-AV is pleased to announce that the LED Video Wall Configurator is now live and ready for our customers to explore, plan and execute their video wall projects,” said Keith Dutch, Managing Director – EMEA, Peerless-AV. “It really is a great time and cost-saving tool, and one that fits the needs of integrators across all professional AV markets.”

From stadiums to control rooms, retail, corporate, and more, the LED Video Wall Configurator eases integration planning for any application. Users can simply and easily design an LED video wall and request a quote for a mount. When users are unsure of the video wall size needed, they can input room dimensions and explore different scenarios until they find the solution that meets their needs. They can then continue through to request pricing, and all quotes will be stored for future reference. The configurator will also provide useful information such as mount weight, video wall power consumption, and video wall display resolution.

To best meet users’ needs, Peerless-AV’s configurator offers a variety of displays to choose from, not limiting options based on brand. If the display users seek is not listed, they can manually enter their display specifications and begin designing a configuration.

To experience Peerless-AV’s LED Video Wall Configurator, please visit: ledconfigurator.peerless-av.com.
