

Peerless-AV® Presents DvLED Mounting Solutions at Midwich Tech Xposed 2019

See wow-factor video wall showcases, outdoor displays, kiosks, dedicated mounting solutions and more on stand 13

Watford, UK, 28 August 2019 – AV technology pioneer Peerless-AV® today announced its participation at this year's Tech Xposed, 11-12 September, Ascot Racecourse. On stand 13, Peerless-AV will highlight its LCD and DvLED video wall mounting capabilities alongside an IP68-rated Xtreme™ High Bright Outdoor Display, indoor/outdoor kiosks and a new dedicated Floor Mount solution for Samsung's OMN-D Series.

Peerless-AV will be showing its new freestanding base for the DS-OM46ND-FLOOR and DS-OM55ND-FLOOR dedicated floor mounts for Samsung's OMN-D Series back-to-back window display. The base has adjustable levelling feet for stability in any environment, but the solution is especially suited for delivering eye-catching content at temporary installations such as shows and events.

Of the three video wall showcases on the Peerless-AV stand, one will feature a mix of Full Service Quick Release Video Wall Mounts, a second will be built with a floor-to-wall Xtrusion upright and SmartMount flat panel wall mounts, and a third will be a 4x3 LED video wall using the dedicated IF Mount for Samsung Direct View LED Displays.

Peerless-AV's universal, dedicated and custom mounting solutions for DvLED video walls lead the way in the market for their quick and easy installation, UL safety testing, quality assurance, modularity for easy transportation and damage prevention, and precision engineering with display specific adaptors and mounting patterns. An aluminium frame minimises wall load and predetermined adaptor rail locations speed up assembly, while tight tolerances and wall plate spacers ensure LED cabinets are positioned correctly. Adjustment on the X, Y, and Z axis overcomes wall imperfections, aligns pixels and smooths any installation irregularities. Depth

adjustment at the rear of the frame also makes fine-tuning easier and facilitates a slimmer aesthetic design.

This year, Peerless-AV is pleased to be providing AVIXA RU Provider Course Approved Direct view LED Mount Install Training on both days of Tech Xposed. During this course installers will learn the different options for LED mounting, wall types and fixings required, cabinet differences, and will also have the opportunity to get hands-on to learn handy install tips and techniques along the way. By the end of the course installers will be confident in specifying the correct mount for any application and be able to install LED solutions quickly and effectively.
