

ISE 2019 PREVIEW - Hall 12, H90

Peerless-AV's New Smart City Kiosk Offers All-Weather Rated, Elegant Design

Outdoor kiosk integrates a host of attractive features for all stakeholders from municipal authorities to citizens and visitors to integrators

Watford, UK, 15 January 2019 – AV technology pioneer Peerless-AV[®] today announced its new, outdoor Smart City Kiosk. A modern, approachable and practical digital signage solution, the Smart City Kiosk combines functionality and aesthetics, and can endure the rigours of everyday use when unattended. Four models are available in the new Smart City Kiosk line – 49" or 55" with Peerless-AV's Xtreme™ High Bright Outdoor Display included (KOP2549-XHB-EUK, KOP2555-XHB-EUK), or as a kiosk enclosure only, designed for 46" or 55" Samsung OHF Displays (KOP2546-OHF-EUK, KOP2555-OHF-EUK). The new all-weather rated solution is ideal for sharing corporate or community information, travel and weather details, as well as wayfinding, advertising, entertainment and more.

"Our new Smart City Kiosk opens up many new opportunities in the outdoor AV market," said Keith Dutch, Managing Director – EMEA, Peerless-AV. "We've received positive feedback from partners and

customers for its robust yet modern design, customisation options, competitive warranties and pricing. Visit our stand at ISE 2019 (Hall 12, H90) to see the Kiosk in action.”

The included Xtreme™ High Bright Outdoor Display, in the KOP25%-XHB-EUK models, is IP68 rated with the widest operating temperature range in the industry (-35°C to 60°C). The fully-sealed display eliminates the need for air conditioning or fans for cooling, making it a maintenance free solution. It also has full HD1080p resolution for a bright crisp picture, even in direct sunlight.

Steel mesh on the rear panel of the Smart City Kiosk enclosure assists Xtreme High Bright Outdoor Displays with passive cooling and allows Samsung OHF Displays to exhaust hot air and intake cool air. The Kiosk’s storage area is tested to IP56 standards to prevent the ingress of dust and water and is protected with filters and cooling fans to keep outdoor rated, high-temperature components at their ambient operating temperature. Interactivity can be added to all four models with an optional plug & play, 10-point IR touch overlay, also tested to IP65 standards to protect against water and dust.

The Smart City Kiosk features a curved, elegant, minimalistic design, and seamlessly blends into any urban setting. It can also withstand winds up to 140 mph. The pedestals mount to concrete or an optional base plate (ACCK204) can be added. Cables are protected within the raceways of each pedestal. Installation is easy, without the need for cranes or forklifts, and access to the rear of the display, via a tubular key cam lock on the Kiosk’s rear panel, provides security while allowing convenient servicing and maintenance.

The Smart City Kiosk’s standard design makes it easy to transport and deploy, for 24/7 unattended operation, in a wide range of outdoor applications such as corporate, digital signage, retail, hospitality, sports venues, amusement parks, transportation, government, university settings and more. It is available in matte black or silver, but custom colours, branding and logo options are offered to meet personalisation requirements.

The new Smart City Kiosk is available now through Peerless-AV’s authorised reseller and distribution network, and will be showcased on the Peerless-AV stand at ISE 2019, Hall 12, H90.
