

## **Peerless-AV's Heavy-Duty Projector Mount Saves Installation Time in Large Venues**

*Pre-assembled design and unique dedicated adaptor plates dramatically reduce installation time in concert halls, conference venues, stadiums and arenas*

**Watford, UK, 24 July 2018** – AV technology pioneer Peerless-AV<sup>®</sup> today announced the availability of its new PJR250 Heavy-Duty Projector Mount, precision engineered to speed up and simplify the installation and alignment of large venue projectors weighing up to 113.4kg. Other key features include a low-profile, pre-assembled design with Hook-and-Hang™ system and unique dedicated adaptor plates for all the major heavy-duty projector brands. The PJR250 was showcased for the first time at ISE 2018.

“Mounting heavy projectors can be a challenge in big entertainment venues, especially those requiring multiple large units to achieve the desired 3D mapping or image blending experience,” said Keith Dutch, Managing Director – EMEA, Peerless-AV. “With our new PJR250, we are providing integrators and installers with a totally unique and differentiated solution that gives them peace of mind, while making installation so much easier.”

The PJR250's simple Hook-and-Hang™ feature provides a large landing area when securing a projector to the mount thereby allowing a quick and easy installation. Furthermore, dedicated adaptor plates, which are designed for all heavy-duty projector brands, place the centre of gravity in the middle of the mount to simplify adjustments and achieve the perfect balance when ceiling or flush mounting a projector. Unique in the market, these adaptor plates bring significant time savings by eliminating the hassle of having to install legs, which can be difficult to stabilise and can lead to projector sag over time.

Additional features include horizontal adjustment up to 3" and  $\pm 1.5$ " (38mm) of lateral shift for perfect image alignment. The tilt (+15/-5°), roll ( $\pm 5^\circ$ ) and swivel (360°) features are all lockable to prevent even the smallest shift to the image once install is complete. A safety cable is included for assurance when handling and installing such weighty equipment. Cable management allows cables to be routed through the projector mount and out of sight. In ceiling mounted applications, multiple locations are built-in to secure cabling from the column to the projector.

The [PJR250 Heavy-Duty Projector Mount](#), and Dedicated Adaptor Plates for Christie, Barco, NEC and Panasonic projector models, are available now through Peerless-AV's distributor and reseller network.
