

Russian Railways' Operators See the Big Picture with new Giant Video Wall in Moscow Control Centre

CASE STUDY
OCTOBER
2018

JSCo “Russian Railways”, one of the main transportation companies in the world and one of the biggest enterprises in Russia, has installed a large-scale video wall in its Moscow transport hub centre using award-winning video wall mounts from AV technology pioneer Peerless-AV®. The 11x6 video wall enables the control centre operators to visualise critical transport network data in real-time from their workstations with ease.

Russian integrator and LFD manufacturer AMS were responsible for the installation, selecting Peerless-AV DS-VW765-LQR Full-Service Quick Release Video Wall Mounts to support the 66 x 55” AMS LCD displays, featuring 1.7mm bezel and 700nit brightness. Integrated within a purpose-built recessed wall structure, the video wall has a seamless, professional appearance and a side door allows access to the rear easy maintenance and servicing.

Peerless-AV’s DS-VW765-LQR mount has definitely lived up to expectations. Features such as tool-less micro adjustments at 8-points and the quick release pop out system, made the installation of such an extensive video wall structure simple, quick and convenient for our team of engineers.

Alexander Nikolaev, Deputy Director of AMS Group of Companies

The DS-VW765-LQR, for 46-65” screen sizes, is a highly versatile, modular mount designed for unlimited video wall configurations. It is ideal for recessed video wall applications such as this, providing easy-access to any display with its spring loaded, quick release functionality, and its no-tools-required micro-adjustment feature allow effortless precision display alignment. A handy keyhole wall plate speeds up mount positioning and custom wall plate spacers eliminate guesswork and on-site installation calculations and measurements, reducing installation time and cost.

About Peerless-AV®
