Alignment runways

JA5501F is produced with runways ready for alignment which makes it excellent for small and medium garages who work on larger vehicles or vans, and need an alignment lift.

Safety

JA5501F has 4 point safety locks which give the consumer a safe and reliable 4 post lift for everyday use. JA5501F has a rise time of 55 sec. and a lowering time of 45 sec.

Functionality and capacity

JA5501F is a hydraulic 4 post lift. The piston is positioned below the ramp and steel wires make sure the force from the piston does the lift rises and is lowering. Max lifting height 1845mm and a loading capacity of 5500kg.

Access ramps

Because of the low profile access ramps, it is possible to work with all kinds of vehicles. When auto lift is rising will ramps tilt so that the vehicle is safe on the lift.

JA5501F is an ideal solution for consumers who need a strong and reliable 4 post lift with alignment runways. An optional hydraulic jack can be placed between the runways. JA5501F are CE approved.
