

Flow Stop Gas/Water Shut-Off Controller

Valuable helper in need

Motor operated shut-off controller

Automatic flow stop
for gas and water pipes

Ball valve closes in just 10 seconds

Controllable by pc, notebook,
mobile devices – and sensors

Quick and easy installation

Motor requires only 12V (1A)

Delivery scope

Side view

Overflowing bathtubs, leaking washing machines or defects to gas and water pipelines – damages can occur almost anywhere and cause immense costs. The **POPP Flow Stop** can prevent this. It is a motor operated shut-off controller for automatic flow stop of gas and water pipes. It is equipped with Z-Wave technology. This means it is particularly suitable for use in smart homes.

Even installation is child's play. The Popp Flow Stop is delivered completely including valve control/motor, power supply, mounting and Quick Start Guide and is easy to assembly on the existing ball stop valve. In doing so, all usual pipe standards, including ½" and ¾", are possible. On this occasion no pipes must be dismantled or even water must be drained. That way the installation is normally done in 5-10 minutes.

The Popp Flow Stop is driven by a motor and closes the ball valve mechanically. Even though the motor requires only 12 Volt (1A), it has a high power output as well as high torque, which reliably closes the ball valve in just 10 seconds. Also a manual closing of valve is easily possible in case of power failure – thanks to the clutch release bearing.

In the event of leaking gas or water the smart home gateway – when combined with sensors and connected via Z-Wave – is able to stop a further inflow automatically and thus protects against more extensive damage and further danger.

Dimensions: 70x93x77 mm

Weight: 340 g

-  Heating and Climate Control
-  Security Systems
-  Lighting Control
-  Alarm Systems
-  Remote Controls
-  Control Center/ Gateway
-  Sensors
-  Device Control/ Plugs
-  Window and Blind Control

With POPP products your home will become intelligent. Control your house or apartment by tablet pc, desktop pc, smartphone or remote control. Activate the heating when you're heading home, close your windows automatically if the weather changes and receive short messages when sensors set off any alarm at home.

For its smart home products POPP trusts Z-Wave technology. Z-Wave is the international leading standard for wireless communication between intelligent devices in homes and offices and thereby the basis for successful home automation.

POPP smart home products are compatible and interoperable with Z-Wave certified devices from more than 300 manufacturers worldwide.
