

# HOW TO REPLACE THE SLIDES ON YOUR TOOLBOX

## OPTION 1

1. Open the drawer. Push down on the plastic lever on one side while pulling up on the plastic lever on the other side. Remove the drawer.

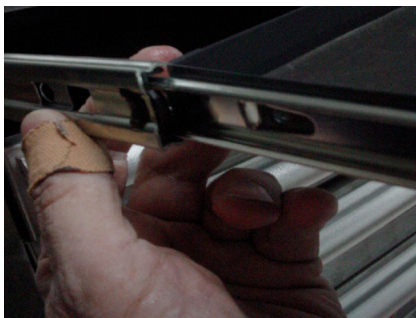

2. Pull the slide out until fully extended. Lift up and twist towards the inside. Remove the slide.

3. Insert the back horizontal tab, then the front vertical tab. Push down to secure.

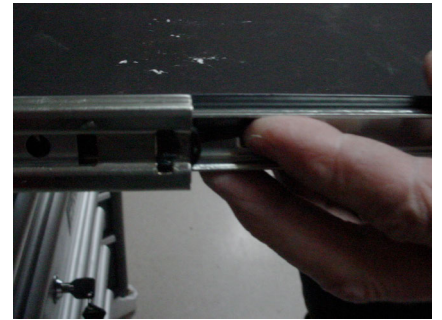

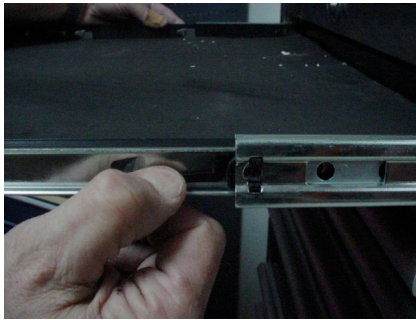

4. Put the drawer back in place by carefully aligning the slides. Completely close and open the drawer to make sure it is installed properly.

# HOW TO REPLACE THE SLIDES ON YOUR TOOLBOX

## OPTION 2

1. Open the drawer. Push down on the plastic lever on one side while pulling up on the plastic lever on the other side. Remove the drawer.

2. Separate the slide from the side of the toolbox with a flat screwdriver. Pull forward to remove from tabs.

3. Insert the back horizontal tab, then the front vertical tab. Lock with a rubber mallet.

4. Put the drawer back in place by carefully aligning the slides. Completely close and open the drawer to make sure it is installed properly.
