Made in Quebec

Renowned products for their effectiveness.

EFFECTIVENESS

Made to measure

Our mission is to create products that deliver impeccable performance and leave minimal impact on health and the environment.

We rigorously develop the formulas of our products in our factory in St-Alexandre-de-Kamouraska according to the highest standards of the industry (Good Manufacturing Practice (GMP), Health Canada).

In compliance with the highest international standards in health and in the environment, all our products are then tested in laboratories external.

The concern of quality

The quality of our products is what sets us apart from the beginning. Order free samples and test our products more concentrated more versatile and more powerful to understand and appreciate the results offered by **Pure**.

- + More concentrated with more active agents for better performance.
- + Versatile formula ideal for many uses (reduces your inventory).
- + Degreaser, anti-freeze, anti-taint, no-trace, shine, easy to use.

The advantages of bulk in your company.

SAVINGS

360° savings

Bulk has several advantages both on the environment and on the economy to purchase. A filling station in your company is a logical choice in order to :

- Save on the cost of the purchase;
- Save money by reusing your own containers;
- Reduce your use of packaging and plastics;
- Minimize your impact on the environment;
- Reduce the cost of repetitive order management;
- Reduce the reception handling of orders.

The advantages of our filling station

- **Pure**® carton box with bag containing 10 L of products and a faucet.
- Box made in Quebec from recycled fibers.
- Recyclable plastic bag n° 7 in sorting centers.
- Two types of faucets available for liquid and viscous products.
- Innovative glouk-free plug facilitates and accelerates filling of your containers.
- Ergonomic box using much less space than a container plastic of the same size.
- Two openings to ensure an easy and safe grip respecting the load handling standards of the CSST (see perhaps writing).

Sustainable development.

ECO-FRIENDLY

For the planet and future generations

Pure® makes it possible to integrate a global approach in sustainable development within your business to minimize your impact on health and the environment. Future generations will thank you.

- Biodegradable according to OECD 301D.
- Safe for septic system.
