HOW TO MEASURE

ring size

= CIRCUMFERENCE

= DIAMETER

HOW TO MEASURE CIRCUMFERENCE

1. Cut a piece of paper roughly the same width as the ring you'll wear.
2. Tape one end of the paper and wrap it firmly around your finger.
3. Once wrapped, use a fine pen to mark where the end of the paper sits to find out the circumference.
4. Lay the paper against a ruler and measure in mm.
5. Cross reference with the ring sizing chart on the next page. If you are in between sizes, choose the size closest to your circumference.

TIP: Measure from the inside to the inside

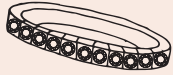

HOW TO MEASURE DIAMETER

1. Use the cutting from the above steps.
2. Tape the ends together to create a paper ring.
3. Place it on top of a piece of paper & mark each edge.
4. Measure from one side to the other to find the diameter.

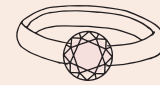

Tip

MEASURE YOUR FINGERS WHEN WARM
(COLD FINGERS WILL MEASURE SMALLER)
