

## PARTS

**A**  
Right Side

**B**  
Left Side

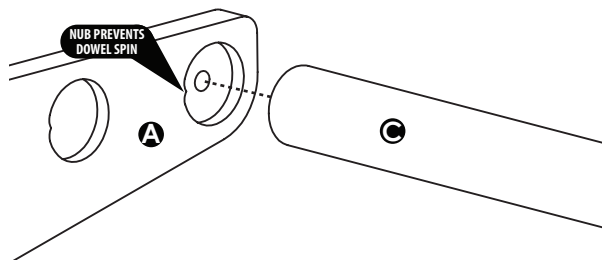

**C**  
(5) Dowels

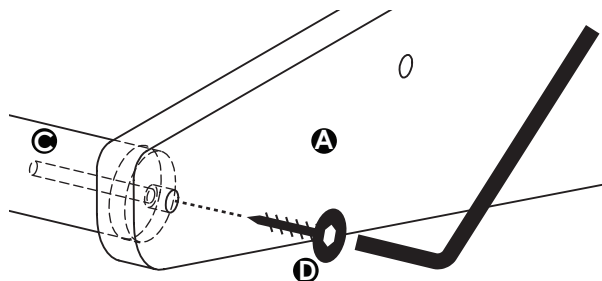

**D**  
(4) Black Screws

## ASSEMBLY INSTRUCTIONS

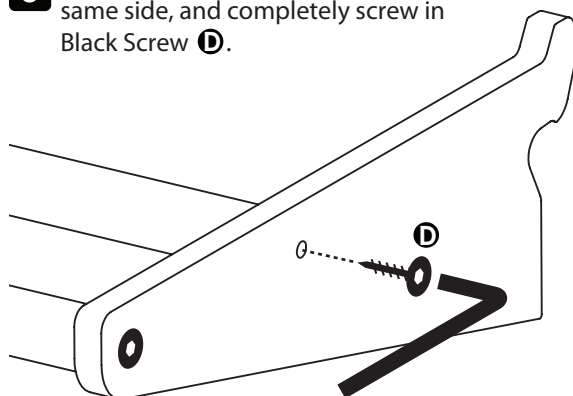

- 1 Press Dowel **C** into front hole on Right Side **A**. The nub in the hole will crush the dowel slightly, preventing the dowel from spinning.

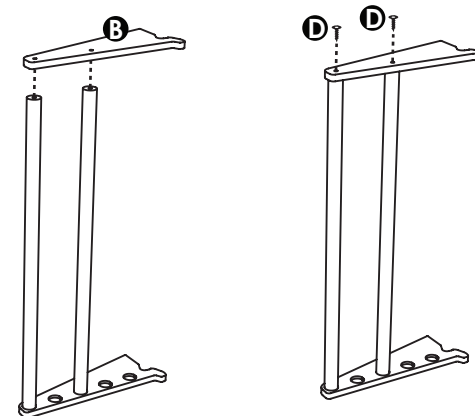

- 2 Completely screw in Black Screw **D** until tight using the 4mm Hex Key that came with the MakerWall Slotboard.

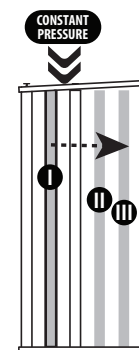

- 3 Press dowel into middle hole on the same side, and completely screw in Black Screw **D**.

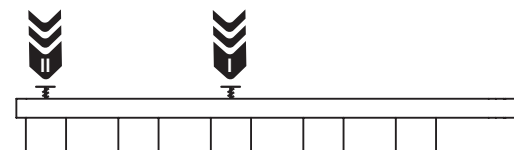

- 4 Press Left Side **B** onto the two dowels, and **loosely** screw in two Black Screws (**not tight**).

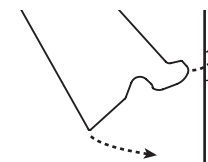

- 5 Carefully put in last three dowels one at a time, moving from front to back. Press down on Left Side **B** with a constant pressure as you do this to prevent dowels from falling out.

- 6 Tighten down the **center** Black Screw, then tighten the front Black Screw.

- 7 Position the Dowel Rack on the slotboard as desired.

**sprout**  
Simple. Modern. American Made.

## MakerWall Dowel Rack

⚠ Adult assembly only

⚠ Assemble completely before use
