

LABYRINTH CONNECTORS

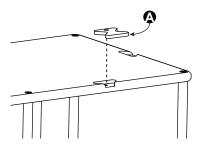

ASSEMBLY GUIDE

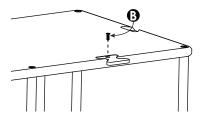

- Fully assemble purchased Labyrinth pieces according to their included assembly instructions.
- Take one of your assembled Labryinth pieces and flip it upside-down. The groove on the bottom should be facing up.

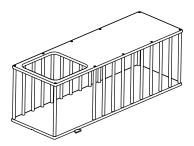

Press Connector Part **A** into one of the grooves. Make sure that the side with the hole is the side pressed into the groove, as shown below.

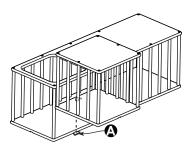

Insert Screw **3** through hole, as shown below. Use screwdriver to thread screw into insert until flush.

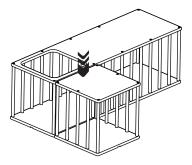

Repeat Steps 3-4 with additional Connector Parts **A** as needed. Flip assembled Labyrinth piece back over.

Take other assembled Labyrinth piece and place it on Connector Part **(A)**, aligning the groove on the bottom with the installed Connector.

Gently apply pressure to second assembled Labyrinth piece to press down onto Connector Piece **a** until fully seated and flush with the floor.

Repeat Steps 2-7 for any additional assembled Labyrinth pieces that you would like to connect.
